WATER ANALYSIS.

THE BEST BOOKS FOR CHEMISTS.

- Chemistry, Inorganic and Organic, with Experiments.** By Chas. Loudon Bloxam. Fourth edition. Over 280 Illustrations. 688 pages, 8vo, cloth. Price 4.00
- A Systematic Handbook of Volumetric Analysis, or the Quantitative Estimation of Chemical Substances by Measure, Applied to Liquids, Solids and Gases.** By Francis Sutton, F.C.S. Third edition. Thoroughly Illustrated. 8vo, cloth. Price 5.50
- Handbook of Modern Chemistry, Inorganic and Organic, for the Use of Students.** By Charles Meynott Tidy, M.B., F.C.S. 8vo, cloth, red edges. Price 5.00
- A Primer of Chemistry, Including Analysis.** By Arthur Vacher. 32mo, cloth. Price 50 cents
- Laboratory Teaching, or Progressive Exercises in Practical Chemistry.** By Chas. Loudon Bloxam. Fourth edition. 80 Illustrations. 12mo, cloth. Price 1.75
- Notes for Students in Chemistry.** Being a Syllabus of Chemistry Compiled from the Manuals of Pownes, Miller, Wentz, and Schorlemmer. By Albert James Bernays. Sixth edition. 32mo, cloth. Price 1.25
- How to Teach Chemistry.** Hints to Science Teachers and Students. By Edward Frankland, D.C.L., F.R.S., and edited by George Chaloner, F.C.S. 12mo, cloth. Price 1.25
- An Introduction to Commercial Organic Analysis.** Being a Treatise on the Properties, Proximate Analytical Examination and Modes of Assaying the various Organic Chemicals and Preparations employed in the Arts, Manufactures, Medicine, etc. By Alfred H. Allen, F.C.S. Vol. 1. 8vo, cloth. Price 3.50

CONTENTS.

INTRODUCTION.

	PAGE
Complete and partial analyses of potable water—Determinations, necessary and unnecessary, for sanitary purposes—Collection of samples	9

PART I.

WATER ANALYSIS WITHOUT GAS APPARATUS.

Preliminary examination of samples	18
Total solid matter in solution	22
Ammonia	24
Chlorine	27
Hardness; Clark's process for softening hard water	29
Estimation of nitrogen as nitrates and nitrites—The zinc-copper method—The aluminium method—The indigo method	35
Nitrites, separate estimation of, by Griess's process	47
Poisonous metals—Lead, copper, arsenic, barium, zinc	51
Suspended matter	52
Estimation of organic impurity—Method of Dittmar and Robinson—Methods of Dupré and Hake—Oxygen or Forchammer process—Classification of waters in respect of organic impurity....	58

PART II.

WATER ANALYSIS REQUIRING GAS APPARATUS.

The combustion process—Determination of carbon and nitrogen in organic matter	67
---	----

6-3-37

	PAGE
The evaporation.. .. .	68
Preparation for the combustion of the water residue.. .. .	73
The combustion.. .. .	74
The gas-measuring apparatus	78
The eudiometrical determinations.. .. .	84
Interpretation of the results of combustion... .. .	91
Classification of waters..... .. .	94
Determination of nitrogen as nitrates and nitrites by the mercury method	95
Total inorganic nitrogen... .. .	98
Previous sewage or animal contamination... .. .	102
Total combined nitrogen	107

APPENDIX.

I.

REAGENTS IN WATER ANALYSIS.

A. For estimation of ammonia..... .. .	109
B. " " nitrogen as nitrates and nitrites	110
C. " " nitrites by Griess's method	111
D. " " chlorine	111
E. " " hardness	112
F. " oxygen or Forchammer process..... .. .	113
G. " determination of organic elements... .. .	113

II.

TABLES.

1. Clark's soap-test table.. .. .	116
2. Soap-test table for parts per 100,000	117
3. Loss of nitrogen by evaporation of ammonia (SO_2H_2)	118
4. " " " " " (PO_2H_2)	118
5. Tension of aqueous vapor	119
6. Reduction of cubic centimetres of nitrogen to grams	120
Arithmetical operations incident to water analysis..... .. .	121

III.

CONVERSION OF PARTS PER 100,000 INTO GRAINS PER GALLON, OR THE REVERSE	123
---	-----

CONTENTS.

vii

PAGE

IV.

TYPICAL ANALYSES OF VARIOUS WATERS.....	124
---	-----

V.

AVERAGE COMPOSITION OF UNPOLLUTED WATERS.....	128
---	-----

VI.

AVERAGE COMPOSITION OF VARIOUS WATERS.....	128
--	-----

VII.

CONCLUSIONS AND RECOMMENDATIONS OF THE RIVERS POLLUTION COMMISSIONERS.

I. As to the chemical quality of water from different sources	129
II. As to the possibility of rendering polluted water again wholesome	135
III. As to the propagation of epidemic diseases by potable water....	135
IV. As to the alleged influence of the hardness of potable water upon health	136
V. As to the superiority of soft over hard water for washing, cooking and manufacturing operations	136
VI. As to the softening of hard water.....	136
VII. As to the improvement of water by filtration... ..	137
VIII. As to the deterioration of water during its transmission through mains and service pipes... ..	138
IX. As to the constant and intermittent systems of supply... ..	138
X. As to the quality of the London water supply derived from the Thames	138
XI. As to the quality of the water supplied to London from the Lea	139
XII. As to the quality of the water supplied to London from deep wells in the chalk....	140
XIII. As to the quality of the water derived from public shallow wells in the Metropolis.....	140
XIV. As to the proposed supply of water to the Metropolis from North Wales and from the lakes of Cumberland	141

	PAGE
XV. As to the supply of the Metropolis with spring and deep well water	141
XVI. As to the water supplies of other British cities, towns, and inhabited places	141

VIII.

STANDARDS OF PURITY RECOMMENDED BY THE RIVERS POLLUTION COMMISSIONERS	143
