MONOGRAPHS ON INDUSTRIAL CHEMISTRY

Edited by Sir EDWARD THORPE, C.B., LL.D., F.R.S.

*Emeritus Professor of General Chemistry in the Imperial College of Science and Technology,
South Kensington; and formerly Principal of the Government Laboratory, London.*

INTRODUCTION

DURING the last four or five decades the Applications of Chemistry have experienced an extraordinary development, and there is scarcely an industry that has not benefited, directly or indirectly, from this expansion. Indeed, the Science trenches in greater or less degree upon all departments of human activity. Practically every division of Natural Science has now been linked up with it in the common service of mankind. So ceaseless and rapid is this expansion that the recondite knowledge of one generation becomes a part of the technology of the next. Thus the conceptions of chemical dynamics of one decade become translated into the current practice of its successor; the doctrines concerning chemical structure and constitution of one period form the basis of large-scale synthetical processes of another; an obscure phenomenon like Catalysis is found to be capable of widespread application in manufacturing operations of the most diverse character.

This series of Monographs will afford illustrations of these and similar facts, and incidentally indicate their bearing on the trend of industrial chemistry in the near future. They will serve to show how fundamental and essential is the relation of principle to practice. They

will afford examples of the application of recent knowledge to modern manufacturing procedure. As regards their scope, it should be stated the books are not intended to cover the whole ground of the technology of the matters to which they relate. They are not concerned with the technical *minutiae* of manufacture except in so far as these may be necessary to elucidate some point of principle. In some cases, where the subjects touch the actual frontiers of progress, knowledge is so very recent and its application so very tentative that both are almost certain to experience profound modification sooner or later. This, of course, is inevitable. But even so such books have more than an ephemeral interest. They are valuable as indicating new and only partially occupied territory; and as illustrating the vast potentiality of fruitful conceptions and the worth of general principles which have shown themselves capable of useful service.

Organic Compounds of Arsenic and Antimony. By G. T. MORGAN, F.R.S., F.I.C., M.R.I.A., D.Sc., A.R.C.Sc., Professor of Applied Chemistry, City and Guilds Technical College, Finsbury, London. 16s. net.

Edible Oils and Fats. By C. A. MITCHELL, F.I.C. 6s. 6d. net.

Coal and its Scientific Uses. By W. A. BONE, D.Sc., F.R.S., Imperial College of Science and Technology, South Kensington. 21s. net.

The Zinc Industry. By ERNEST A. SMITH, The Assay Office, Sheffield. 10s. 6d. net.

Colour in Relation to Chemical Constitution. By E. R. WATSON, M.A., D.Sc., Professor of Chemistry, Dacca College, Bengal. 12s. 6d. net.

The Applications of Electrolysis in Chemical Industry. By ARTHUR J. HALE, B.Sc., F.I.C., Finsbury Technical College, London.

The Natural Organic Colouring Matters. By A. G. PERKIN, F.R.S., The Dyeing Department, The University, Leeds; and A. E. EVEREST, D.Sc., Ph.D., Technical College, Huddersfield.

Catalysis in Industrial Chemistry. By G. G. HENDERSON, M.A., D.Sc., LL.D., F.R.S., The Royal Technical College, Glasgow.

The following volumes are in preparation:—

Liquid Fuel for Internal Combustion Engines. By Sir BOVERTON REDWOOD, Bart., D.Sc., F.R.S.E., and J. S. S. BRAME, Royal Naval College, Greenwich.

- Synthetic Colouring Matters: Sulphur Dyes.** By G. T. MORGAN, D.Sc., A.R.C.S., F.R.S., Finsbury Technical College, London.
- Synthetic Colouring Matters: Vat Colours.** By JOCELYN F. THORPE, C.B.E., D.Sc., F.R.S., Imperial College of Science and Technology, South Kensington.
- Naphthalene.** By W. P. WYNNE, D.Sc., F.R.S., The University, Sheffield.
- Synthetic Colouring Matters: Azo-Dyes.** By FRANCIS W. KAY, D.Sc., The University, Liverpool.
- Utilisation of Atmospheric Nitrogen: Synthetical Production of Ammonia and Nitric Acid.** By A. W. CROSSLEY, C.M.G., D.Sc., F.R.S., F.I.C., King's College, Strand.
- Cement.** By BERTRAM BLOUNT, F.I.C.
- The Principles and Practice of Gas-purification.** By EDWARD V. EVANS, F.I.C., Chief Chemist, South Metropolitan Gas Company.
- Refractories.** By J. W. MELLOR, D.Sc.
- Ozone and Hydrogen Peroxide: their Properties, Technical Production and Applications.** By H. VINCENT A. BRISCOM, D.Sc., A.R.C.S., Imperial College of Science and Technology, South Kensington.
- The Nickel Industry.** By WILLIAM G. WAGNER.
- Cellulose-Silk.** By C. F. CROSS, B.Sc., F.R.S., F.I.C.
- The Electric Arc in Chemical Industry.** By J. N. PRING, D.Sc., The University, Manchester.
- By-Product Coking Practice.** By ERNEST BURY, M.Sc.
- Organic Synthetic Reactions: their Application to Chemical Industry.** By JULIUS B. COHEN, B.Sc., Ph.D., F.R.S.
- Synthetic Colouring Matters: Triphenylmethane Dyes.** By R. ROBINSON, D.Sc., Professor of Organic Chemistry in the University of Liverpool.
- Synthetic Colouring Matters: Anthracene and Allied Dye-stuffs.** By F. W. ATACK, M.Sc. Tech., B.Sc. (Lond.), F.I.C. of the Municipal School of Technology, Manchester.
- Synthetic Colouring Matters: Acridine and Xanthene Dye-stuffs.** By JOHN T. HEWITT, M.A., D.Sc., F.R.S., University of London (East London College).
- Synthetic Colouring Matters: Azine and Oxazine Dye-stuffs.** By JOHN T. HEWITT, M.A., D.Sc., F.R.S., University of London (East London College).
- Synthetic Drugs: Local Anæsthetics.** By W. H. HURTLEY, D.Sc., St. Bartholomew's Hospital; and M. A. WHITELEY, D.Sc., Imperial College of Science and Technology, South Kensington.

MONOGRAPHS ON INDUSTRIAL CHEMISTRY
EDITED BY SIR EDWARD THORPE, C.B., LL.D., F.R.S.

THE APPLICATIONS OF
ELECTROLYSIS IN CHEMICAL INDUSTRY

1. The first part of the document discusses the importance of maintaining accurate records of all transactions and activities. It emphasizes that proper record-keeping is essential for transparency and accountability, particularly in financial reporting and compliance with regulatory requirements. The text notes that without reliable records, organizations may face significant challenges in identifying discrepancies, resolving disputes, and demonstrating adherence to applicable laws and standards.

2. Furthermore, the document highlights the role of technology in streamlining record-keeping processes. Modern software solutions can automate data collection, storage, and retrieval, reducing the risk of human error and ensuring that information is consistently updated and accessible. This technological advancement is seen as a key factor in improving operational efficiency and supporting data-driven decision-making within an organization.

3. In addition, the text addresses the need for clear policies and procedures regarding record management. Establishing standardized protocols for how records are created, maintained, and disposed of helps to ensure consistency across different departments and projects. This structured approach is vital for long-term data integrity and for facilitating audits or investigations when necessary.

4. The document also touches upon the legal implications of record-keeping. Many jurisdictions have specific regulations governing the retention and protection of certain types of records, such as financial statements, contracts, and personal data. Organizations must be aware of these requirements to avoid potential legal penalties and to ensure that their record-keeping practices fully comply with the relevant legal framework.

5. Finally, the text concludes by reinforcing the overall significance of record-keeping as a foundational business practice. It serves not only as a historical record of an organization's activities but also as a critical tool for strategic planning, risk management, and performance evaluation. By prioritizing the quality and accuracy of their records, organizations can build a strong foundation for sustainable growth and success.
