	PAGE
I. INTRODUCTION . . . . .	7
II. SITUATION . . . . .	12
III. HISTORY . . . . .	12
IV. CLIMATE . . . . .	15
V. MINERAL WATERS AND BATHS . . . . .	18
VI. ANALYSIS OF THE HOT SPRING . . . . .	21
VII. ANALYSIS OF THE COLD CHALYBEATE SPRING . . . . .	24
VIII. THE NEW HOTEL . . . . .	29

1. The first part of the document discusses the importance of maintaining accurate records of all transactions and activities. It emphasizes that proper record-keeping is essential for transparency and accountability, particularly in the context of public administration and financial management. The text notes that without reliable records, it is difficult to track the flow of funds and ensure that resources are being used effectively and efficiently.

2. The second part of the document addresses the challenges associated with data collection and analysis. It highlights that gathering accurate and timely data can be a complex task, often requiring the coordination of multiple departments and the use of various data sources. The text also discusses the importance of ensuring the quality and integrity of the data collected, as well as the need for robust data management systems to store and analyze the information.

3. The third part of the document focuses on the role of technology in improving data management and analysis. It discusses how modern data management tools and software can help organizations streamline their data collection processes, reduce errors, and gain valuable insights from their data. The text also touches on the importance of ensuring that these technologies are secure and that data is protected from unauthorized access.

4. The fourth part of the document discusses the importance of data privacy and security. It emphasizes that organizations have a responsibility to protect the personal information of their users and to ensure that data is not shared or accessed inappropriately. The text also discusses the need for clear policies and procedures regarding data privacy and security, as well as the importance of regular security audits and updates.

5. The fifth part of the document discusses the importance of data-driven decision-making. It emphasizes that organizations should use the insights gained from their data to inform their strategic decisions and to improve their operations. The text also discusses the importance of fostering a data-driven culture within the organization, where data is used to drive innovation and growth.

6. The sixth part of the document discusses the importance of data literacy and training. It emphasizes that all employees should have a basic understanding of data and how to use it effectively. The text also discusses the importance of providing ongoing training and support to employees to ensure they are up-to-date on the latest data management practices and tools.

7. The seventh part of the document discusses the importance of data governance. It emphasizes that organizations should have clear policies and procedures in place to govern the use of data, including who is responsible for data management and how data should be shared and accessed. The text also discusses the importance of regular reviews and updates to these policies and procedures to ensure they remain relevant and effective.

8. The eighth part of the document discusses the importance of data ethics. It emphasizes that organizations should be transparent about how they collect and use data, and should ensure that their data practices are fair and ethical. The text also discusses the importance of considering the potential impacts of data collection and analysis on individuals and society as a whole.

9. The ninth part of the document discusses the importance of data interoperability. It emphasizes that organizations should work to ensure that their data can be shared and used by other organizations in a seamless and secure manner. The text also discusses the importance of developing standards and protocols for data interoperability to facilitate this process.

10. The tenth part of the document discusses the importance of data innovation. It emphasizes that organizations should explore new ways to use data to solve problems and create value. The text also discusses the importance of fostering a culture of innovation and experimentation within the organization to drive these efforts forward.

## INTRODUCTION.

HITHERTO sufferers from chronic rheumatism and its allies have usually been obliged to wait until summer heat began, before they could go for their cure to one of the numerous watering-places in Europe, for in none of these, even the most southern, will the climate allow of a thermal mineral water cure being carried out during the cold winter months. Algiers is the only place where such a treatment can be safely attempted, and although situated in Africa, it is really nearer and more easily accessible to Central Europe than many places which, geographically speaking, are in Europe, such as Malta, Madeira, Sicily, and the Azores. It will therefore be a great boon for invalids to know that this region possesses

an excellent winter climate within easy reach (being only thirty-three hours from Marseilles), and where every comfort can be found that an invalid can wish for. The flourishing accounts I had heard from several people who had visited that place made me most anxious to pay it a visit, and judge for myself of its merits.

After leaving my summer quarters at Royat les Bains, I therefore started for Marseilles, crossed the Mediterranean, and landed at Algiers, after a pleasant trip of thirty-three hours. On landing I was much struck with the complete absence of sanitary arrangements in this city, and wonder how invalids can be tempted to reside there for health purposes. Mustapha Superior, a short distance from Algiers, is well situated on the slope of a hill, with charming villas, well surrounded by verdure, and commanding a good view of the Bay. It is chiefly inhabited by English, and it is a decided improvement on the dirty Franco-Arab town.

Being anxious to move on, I left Algiers by the morning train, arrived at the Bou-Medfa Station in three hours, and found there a comfortable conveyance, which took us up the hill in forty minutes to Hammam-Rirha, where we alighted on the 12th of
