**NEW YORK TEACHERS'
MONOGRAPHS: VOL.
II, NO. IV; METHODS
IN NEW YORK SCHOOLS**

RAND, McNALLY & COMPANY CHICAGO—NEW YORK

BRITISH ISLES: A newly-engraved map, in size 66 x 46 inches, handsomely colored. The physical features are well defined, particularly the rugged face of Scotland which stands out in bold relief. This is a most desirable map for English history and literature, as all places of interest in English literature, as well as the principal battlefields, together with the dates on which important engagements were fought, are indicated.

RELIEF GLOBE: This is a new importation, made by a leading German manufacturer. The elevations are shown in actual relief, and the size, ten inches in diameter, allows considerable prominence being given to the mountains and high table-lands. It is handsomely mounted on a mahogany stand with brass meridian. While it is without doubt the most perfect globe of the kind made, it is withal moderate in price.

LIGHTS TO LITERATURE: A series of five readers, perfectly printed, beautifully and appropriately illustrated. Children need and deserve the best, and only the best of the beautiful poems and classic appropriate prose have been chosen in making the selections for this series. These books delight the eye, educate the taste, and cultivate the heart. The Sprague Primer, a companion book to Lights to Literature, is one of the prettiest and most fascinating books ever made for children.

Catalogue and prices will be mailed on application.

U-PI-DEK.

A new Good has alighted to you,
U-pl-dee, U-pl-da!
Is an up-to-datest, tailor-made gown, U-pl-de-ka!
The boys are wild, and you're in, too,
You never saw such a hull-a-ya-oo,
"GIRLIE" - U-pl-de-ka-ka-ka! etc.

Her voice is clear as a sating lark's,
And her wit is like those trolley-car sparks:
When 'cross a muddy street she flies,
The boys all have complexion fits!

The turn of her head turns all ours, too,
There's always a strife to sit in her row;
'Tis enough to make a person drunk,
To hear her sing old coo-a-cho-unk!

The above, and three other NEW verses to U-PI-DEK,
and NEW WORDS, catchy, up-to-date, to many
others of the popular OLD FAMILIAR TUNES; be-
sides OLD FAVORITES; and also many NEW SONGS.

SONGS OF ALL THE COLLEGES.

Copyrighted. Price, \$1.50, postpaid. 1900.

HOLMES' NEW READERS

COLORED ILLUSTRATIONS

THE TEACHING OF

COLOR, FORM, NUMBER AND SIZE,

LANGUAGE AND NATURE STUDY

is carefully correlated with the word-study and reading.

Interesting facts about **Plant Life** and **Animal Life** are woven into charming stories well graded and so judiciously interspersed with other reading matter as not to be monotonous.

The same thing is done with the simpler facts of physics, such as the forces of water, etc., etc.

Our purpose is to have the lessons so bright as to be attractive to children, and at the same time to give them those elementary facts which the Committee of Fifteen recommend being correlated with reading.

Literature in Readings.

There is no series of readings that contains such a large number of selections from standard authors as the HOLMES' READERS.

MAURY'S GEOGRAPHIES

REVISED EDITIONS

The continuous progress of geographical science has prompted this revision of a series of geographies which have for years held a fixed place in thousands of schoolrooms in this country. These books are used by the best schools.

ALL TEACHERS

WILL BE INTERESTED IN

THE NEW SCRIBNER LIST.

"HISTORY OF EDUCATION," by THOMAS DAVIDSON, A.M., LL.D. 12mo, 300 pages. \$1.00, net.

This book is designed for use as a text-book by Normal Schools, Professional Teachers' Classes and general Students of the subject. It begins with early education among the ancient peoples of the Old World and treats its origin and development as evolutionary processes. The personalities and influences of men who are classed as the Great Educators, become the centres around which the history is written, and the progressive tendencies of each period are brought out with distinctness and force. The final chapter is devoted to the future of education and movements which may be reasonably expected in the light of present tendencies.

"THE FORMS OF PROSE LITERATURE," by J. H. GARDNER, Instructor in English in Harvard University, has just been published. It contains twenty carefully selected examples to illustrate Narration, Description, Exposition, Argument and Criticism, preceded by an introductory analysis, and is designed to be used in conjunction with any text-book in English Composition, while originally suggested as a companion book to Professor Barrett Wendell's standard text-book in that subject.

"AN INTRODUCTION TO ETHICS," by FRANK THILLY, Professor in the University of Missouri. 12mo. \$1.25, net. This new work by Professor Thilly promises to be the best introductory hand-book for brief courses. Developed as it has been in the class-room, the practical usefulness has been greatly benefited.

"LOGIC AND ARGUMENT," by Professor J. H. HYBLOP of Columbia University. 16mo, 240 pp. 75 cents, net. Published six months ago, this book is now in its Second Edition. It has already been adopted by twenty of the leading colleges. The author aims at the most elementary instruction given in the ordinary college course. He combines Rhetoric with Logic in his volume which is practical and convincing. It is an advisable text-book for Colleges and Normal Schools.

Announcement of New Educational Books.

"ELEMENTARY PHYSICAL GEOGRAPHY," An Outline of Physiography, by JACQUES W. REDWAY, F.R.G.S. 12mo, about 350 pages, fully illustrated and containing numerous maps, charts and diagrams. \$1.25 net.

The author is probably the best known authority upon this subject in the country to-day. As the author of the new "Natural School Geographies" he is recognized not only as an authority but for his ability in presenting the subject to young students. The book is designed for use in High Schools and Preparatory Schools, and promises to displace from use the present text-books in the subject. The intimate relations between Geology and Physical Geography are made prominent, while special attention is given to phenomena which may readily be observed and practically studied.

"GENERAL HISTORY OF EUROPE," 500-1900, by OLIVER J. THATCHER, Associate Professor of History, University of Chicago, and FERDINAND SCHWILL, Instructor in History, University of Chicago. 19mo, about 450 pages. With many maps, chronological tables, etc. \$1.50 net.

The great success which these two authors have attained in their two standard text-books for college use, "Europe in the Middle Age," and "Modern Europe" is sufficient guarantee that this new book prepared expressly for High Schools, will meet with the greatest favor. The distinguishing feature will be the recognition of the possibilities in a High School course, and the means now used by most competent teachers to secure these. The period covered is from the invasion of the Barbarians in the fourth century to the end of the nineteenth century.

"COMENIUS AND THE BEGINNING OF EDUCATIONAL REFORM," by WILL S. MONROE, A.B., Professor of Psychology and the History of Education in the State Normal School at Westfield, Mass. 12mo. \$1.00, net. The Great Educator Series.

Professor Monroe has traced the great reform movement in education from its inception in the sixteenth century, through Comenius down to our day. Although Comenius is made the central figure of the book, the author surveys the state of education in Europe in the sixteenth century; indicates the influences of other reformers in the Moravian reformer, and in turn traces his influences in the subsequent reformers—notably Rousseau, Pestalozzi, Froebel and Herbart.
