N O T I C E .

THE Publishers, on issuing the second volume of Rev. Mr. Banvard's Series of American Histories, are happy to state that the commendatory notices of the press, and the rapid sale of the first volume, give flattering encouragement for the series. Other volumes are in course of preparation.

This series will embrace the most interesting and important events which have occurred in the United States since the first settlement of the country ; illustrating the trials and adventures of the early colonists both at the North and the South, their intercourse and conflicts with the natives, their peculiarities of character and manners, the gradual development of their institutions, sketches of their prominent men in both the Church and the State, incidents in the Revolution, with various other subjects of interest of more recent date. They will be adapted to the popular mind, and especially to the youth of our country, and will contain numerous fine engravings. There will be twelve or more 16mo. volumes, consisting of about three hundred pages each, each volume to be complete in itself ; and yet, when all are published, they will, together, form a regular SERIES OF AMERICAN HISTORIES.

The next volume will contain a particular account of the incidents which occurred in the first settlement of *Virginia* -- the colonies of Sir Walter Raleigh ; the history of Captain John Smith ; and the romantic adventures of Pocahontas.

P R E F A C E .

AFTER the discovery of America, a number of years elapsed before any permanent settlements were formed, especially on the northern portion of the continent. During this interval, and also after colonies began to be planted, courageous and enterprising men made various explorations along its almost interminable coasts, and into its vast, unknown interior. In these excursions they had numerous interviews with the natives, to whom they were as strange, in their appearance, language, and manners, as the wild natives were to them. Sometimes this intercourse was friendly, at other times belligerent. It resulted in many adventures, both romantic and tragic, and also in many geographical discoveries.

To give an account of the more important of these adventures and discoveries is the object of the present volume. Chronological order has been observed, so far as it would not interfere with the continuous narrative respecting particular individuals.
