PREFACE.

WE have every reason to believe that this Manual of Household Sewing and Home Dressmaking will supply a much-felt want, and be welcomed as a valuable addition to the Scheme of Domestic Science Education. The experiment, suggested by a visit to Karlsruhe, of making "mending, patching, and darning" a branch of continued, and of Technical Education for Women, in England, has proved a complete success, and we trust will aid the "Maker of the Home" in all classes of society.

Many complaints have come from working men that their wives and daughters could neither mend nor patch, and *that there was nowhere to send them to learn*. Now that reproach is to a very great extent wiped away, and both Afternoon and Evening Technical Classes for Women offer opportunities, at a very small cost, to any wishing to learn. Such a Manual as this will be useful not only to Teachers, but equally so to learners anxious to make good use of the knowledge obtained from the lessons given in the classes.
