Entered according to Act of Congress in the year 1890, by
WM. HENRY MAULE,
in the office of the Librarian of Congress at Washington.

Prefatory Remarks

By the Publisher.

A work on gardening, up to the times and fully explaining all modern methods, has long been needed. Several years ago I started the rough outline of a treatise on this subject, but owing to my time being so largely taken up with my varied business interests, I found it impossible to finish it; and to tell the truth I did not feel competent to handle the subject as it deserved. At this stage of the proceedings my friend, Mr. T. Greiner, offered to take a hand, and for a year or more he has been busy writing the following pages, which I take pleasure in presenting to the public as the very best and most practical work ever written for the benefit of the American vegetable gardener.

I am confident it will prove the stepping-stone to successful gardening for many thousands who are now unacquainted with this, the noblest calling on earth; while I know it will give many profitable common-sense ideas to those who are even now high up in the profession.

Yours very truly,

WM. HENRY MAULE.

INDEX.

Acme, Harrow	42	Carrots	170
Ammonia, Sulphate of	38	Catnip	173
