## PREFACE.

---

MANY excellent works have been published in this and other countries with the aim of guiding mothers in the management of their children during health and sickness. To some of these we are indebted for assistance in the preparation of the following pages,—especially to the late Dr. Andrew Combe's valuable treatise on 'The Management of Infancy,' revised and edited by Sir James Clark; to Professor Fonsagrive's interesting work entitled 'Le Rôle des Mères dans les Maladies des Enfants'; and also to Dr. Chevassé's well-known 'Advice to Mothers.' These and all the treatises already published on this subject appear, however, to suffer from two
