## PREFACE.

---

THE publishers take great pleasure in presenting this work to the public. The intrinsic merit of the subject to which it is devoted, and the fact that it was called for in a course of lectures to the students of the "Western Liberal Institute," evince the belief that an absolute demand for the work exists, and that it will be received with gladness and read with profit by the young men and women of our country. The following correspondence will explain the occasion, and the reception of the lectures.

MARIETTA, O., Sept. 20, 1851.

REV. G. S. WEAVER:

*Dear Sir,*—I am instructed by the Anthropological Society of the Western Liberal Institute, to invite you to deliver a course of lectures upon the subject of mental science, before the society, in the hall of the Institute: one lecture on each Friday evening during the present quarter. This will require a series of ten. A general view of the philosophy of mind, made plain and practicable, would suit the wishes of the society. Your maturer judgment, of course, will be our guide on this great subject. We hope nothing ordinary will prompt you to decline. Shall we be favored with an early reply? Yours, etc.,

O. LEWIS CLARK, Secretary.
