A CATALOGUE  
OF THE  
MODELS  
OF  
DISEASES OF THE SKIN  
IN THE  
MUSEUM OF GUY'S HOSPITAL,

ARRANGED ACCORDING TO THE  
CLASSIFICATION OF WILLAN AND BATEMAN.

BY

S. O. HABERSHON, M.D., LOND.

LICENTIATE OF THE ROYAL COLLEGE OF PHYSICIANS, ASSISTANT-PHYSICIAN TO GUY'S  
HOSPITAL, CURATOR OF THE MUSEUM, ETC.

LONDON:  
JOHN CHURCHILL, NEW BURLINGTON STREET.  
MDCCLIV.

157. lv. 57.

1. The first part of the document discusses the importance of maintaining accurate records of all transactions and activities. It emphasizes that proper record-keeping is essential for transparency and accountability, particularly in the context of public administration and government operations. The text notes that without reliable records, it becomes difficult to track expenditures, assess performance, and ensure that resources are used efficiently and effectively.

2. The second part of the document addresses the challenges associated with data collection and analysis. It highlights that gathering accurate and complete data can be a complex and time-consuming process, especially when dealing with large-scale operations or multiple stakeholders. The text suggests that implementing standardized data collection procedures and utilizing modern technology can help overcome these challenges and improve the quality and reliability of the information gathered.

3. The third part of the document focuses on the importance of data security and privacy. It stresses that sensitive information, such as personal data or financial records, must be protected from unauthorized access, disclosure, or loss. The text outlines various measures that can be taken to ensure data security, including implementing strong encryption protocols, access controls, and regular security audits. Additionally, it emphasizes the need for clear policies and procedures regarding data privacy and the rights of individuals whose data is being collected and processed.

4. The fourth part of the document discusses the role of data in decision-making and performance evaluation. It argues that data-driven insights are crucial for identifying trends, understanding the impact of various initiatives, and making informed decisions about resource allocation and program implementation. The text suggests that organizations should invest in data analysis tools and capabilities to enable them to extract meaningful insights from their data and use these insights to drive continuous improvement and innovation.

5. The fifth and final part of the document provides a summary of the key points discussed and offers recommendations for future action. It reiterates the importance of maintaining accurate records, addressing data collection challenges, ensuring data security and privacy, and leveraging data for decision-making and performance evaluation. The text concludes by encouraging organizations to adopt a data-driven mindset and to continuously monitor and improve their data management practices to achieve their goals and objectives.

**DISEASES OF THE SKIN.**

## EXANTHEMATA.

RUBEOLA—Vulgaris, 58, 59, 60.

Nigra.

SCARLATINA—Simplex, 62, 63, 64.

Anginosa.

Maligna.

URTICARIA—Febrilis, 68.

Evanida, 66, 67, 67<sup>a</sup>.

Perstans.

Conferta, 69, 70.

Subcutanea.

Tuberosa, 69, 70.

ROSEOLA—(Estiva.

Autumnalis.

Annulata, 71, 72.

Infantilis.

Variolosa.

Vaccina, 73.

Miliaris.

ERYTHEMA—Fugax.

Læve.

Marginatum.

Papulatum.

Tuberculatum, 74.

Nodosum, 74, 75, 76.

Intertrigo.

ERYSIPELAS—Phlegmonodes, 77, 78, 79.

Edematodes.

Gangrenosum.

Erraticum.

FEBRIS—Typhus, 80, 81, 82.

Typhoid, 83.

## PURPURA.

PURPURA—Simplex, 84, 85.

Hæmorrhagica, 86.

Urticans, 85<sup>1/2</sup>.

Senilis, 87.

## SCORBUTUS.

SCORBUTUS, 88, 89.

## BULLE.

POMPHOLYX—Benignus, 90, 91.

Diutinus 92, 93, 94, 95.

Solitarius.

Syphiliticus, 286<sup>a</sup>.

PEMPHIGUS—96, 97.

PUSTULÆ.

- IMPETIGO**—Figurata, 98.  
 Sparsa, 99, 100.  
 Erysipelatodes.  
 Scabida, 101, 102, 103, 104.  
 Rodens.  
 (Diseased nails after impetigo,) 105.
- PORRIGO\***—Purpurans, 106, 107.  
 Scutulata, 108.  
 Favosa, 109, 109<sup>1</sup>, 115?  
 Lupinosa, 110, 111, 112, 113, 114.
- ECTHYMA**—Vulgare, 116; Impetiginous? 123.  
 Infantile.  
 Luridum, 117.  
 Cachecticum, 118, 119, 120, 121, 122, (with Furunculus,) 121.  
 Syphiliticum, 271, 271<sup>6</sup>, 272, 273.
- VARIOLA**—Discreta, 124, 125, 126, 127, 128.  
 Confluens, 129, 130, 131, 132.  
 (After vaccination), 133.
- SCABIES†**—Papuliformis, 134, 135.  
 Lymphatica, 136, 138.  
 Purulenta, 139, 140, 141, 142, 143, 144, 145, 146.  
 Cachectica, 141, 144, 145, 146.  
 (With Eczema,) 148.  
 (With Ecthyma and Syphilitic Lichen,) 147.
- VESICULÆ.**
- VARICELLA**—Lentiformis, 149.  
 Coniformis, 149.  
 Globularis, 150, 151.  
 (With Vaccinia,) 149.
- VACCINIA**—152, 153, 154, 155, 156, 157.  
 (Pustulation with Erythema,) 158, 159, 160.
- HERPES**—Phlyctenodes, 161, 162, 163.  
 Zoster, 164, 165, 165<sup>5</sup>.  
 Circinatus, 166, 167, 168, 169, 170? 171?  
 Iris, 171? 172.  
 Labialis, 163.  
 Preputialis.
- RUPIA**—Simplex, 173, 174, 175<sup>60</sup>.  
 Prominens, 176, 177, 178.  
 Escharotica, 3, (with Strophulus.)  
 Cachectica, 179, 180? (with Ecthyma,) 271<sup>5</sup>.  
 (Ulceration,) 181.  
 Syphilitica, 274.

\* Several of the forms of porrigo are not truly pustular, but are connected with microscopical vegetable growth.

† Generally vesicular, arising from the presence of an acarus.

- MILIARIA—182, 182<sup>a</sup>.  
 ECZEMA—Solare, 183, 184.  
     Impetiginodes, 185.  
     Rubrum, 186, 187, 188, 189, 190, 191, 192.  
     Arsenicale, 192<sup>ab</sup>.  
 TUBERCULÆ.  
 VERRUCA—193, 193<sup>10</sup>, 279.  
 MOLLUSCUM—194, 195, 196, 196<sup>ab</sup>, 197, 198, 199.  
 VITILIGOIDEA—of Addison and Gull. Plana, 200, 201.  
     Tuberosa, 202, 203, 204, 205, 206, 207?  
 ACNE\*—Simplex.  
     Punctata, 208, 208<sup>a</sup>.  
     Indurata, 209, 210, 211, 212.  
     Rosacea, 211.  
 SYCOSIS†—Menti, 213, 214.  
 LUPUS—215, 216, 217, 218, 219, 219<sup>ab</sup>, 219<sup>ac</sup>, 219<sup>ad</sup>, 219<sup>ae</sup>.  
 KLEOID—of Addison, 220, 221, 222, 223, 224, 225, 226, 227, 228.  
     of Alibert, 229, 229<sup>1a</sup>, 230, 231, 231<sup>1a</sup>, 231<sup>11</sup>.  
 ELEPHANTIASIS—Arabian or West Indian Leprosy, 232, 233, 233<sup>a</sup>, 233<sup>1a</sup>,  
     234, 235, 235<sup>a</sup>, 235<sup>1a</sup>.  
     East Indian Leprosy, 236.  
     Spuria Syphilitica, 237, 238, 239, 240.  
 ELEPHAS—of *Barbadoes Ley*, 241, 242, 243.  
 FRAMBŒSIA—Yaws? 244.  
 MACULÆ.  
 MELASMA—*Supra-Renale of Addison*, 245, 245<sup>a</sup>, 246.  
 EPHELLIS—247.  
 NÆVI—Pigmentares, 248, 249.  
     Vasculares, 250, 251, 252, 253, 254, 255.  
 SYPHILIS.  
 LICHEN—256, 257, 258, 259, 260, 261, 262, 264, 265.  
 LEPRO—266, 267, 268, 268<sup>a</sup>, 269, 270.  
 RUPIA—274.  
 ECTHYMA—271, 271<sup>ab</sup>, 272, 273.  
 TUBERCULA—275, 276, 277, 278, 279, 280.  
 CONGENITALE—281, 282, 283, 284, 285, 285<sup>a</sup>, with Pompholix.  
 ANTHRAX, 286, 287, 288, 289.  
 MELANOSIS OF SKIN, 290, 291, 292, 293, 293<sup>a</sup>, 297<sup>a</sup>.  
 GLANDERS, or EQUINIA, 294, 295, 296.  
 ULCERATION FROM BITE OF A SNAKE, 297.  
 SUPERFICIAL GANGRENE OF THE SKIN, 298.  
 ECCHYMOSIS AFTER DEATH, 299.  
 WHITE TUBERCLE, 300.

\* Follicular disease of the skin.

† Arising from the development of fungi in hair follicle.

## STROPHULUS:—

1. STROPHULUS INTERTINCTUS. Model of the face of a child, presenting papulæ raised, and more or less inflamed.
2. STROPHULUS INTERTINCTUS. Model of the arm of a child, presenting inflamed papulæ, intermixed with red patches on the skin.
3. STROPHULUS ALBIDUS (with RUPIA). Model of the face and neck of a child, exhibiting numerous raised, uninfamed small pimples; and on the neck are several cachectic rupial ulcers.
4. STROPHULUS CONFERTUS. Arm and shoulder of a child, presenting patches of inflamed papulæ; on the axilla are several inflamed vesicles.
5. STROPHULUS CANDIDUS et VOLATICUS. This model presents the arm of a child with papular eruption; some are smooth, shining, isolated, and elevated, without surrounding redness (strophulus candidus); others are small, circular clusters of four to ten papulæ, with circumscribed redness (strophulus volaticus.) On the arm two or three vesicles are also observed.
6. STROPHULUS CONFERTUS et CANDIDUS. Leg of a child, presenting several inflamed patches somewhat resembling urticaria, with other large isolated papulæ, and intervening red patches.
7. STROPHULUS CONFERTUS. Leg and thigh of a child; several patches of inflamed papulæ, some clusters with surrounding inflammatory redness; on the inner part of the thigh and leg, raised, shining vesicles.

## LICHEN:—

8. LICHEN SIMPLEX. Model of a thigh, covered on its anterior part with dull-red inflamed papulæ; one or two vesicles are also present.
