PREFACE

THIS volume contains the criticism of the contemporary biological systems. That enquiry is necessary as an introduction to the study of the problems of organic life, but it is not in itself a doctrine of biology. The argument ought to proceed to the discussion of the philosophy of nature.

I have to thank Dr. C. M. Douglas, Dr. George R. Wilson, and Mr. A. B. Macaulay, for suggestions in connection with various parts of the book.

G. S.

COLINTON, *October*, 1896.
