PREFACE

ANYTHING in the shape of critical or expository comment may at first sight appear rather an encumbrance than a service to a body of poetry which, like the pieces here selected chiefly from the volumes entitled *Soliloquies in Song, At the Gate of the Convent*, and *Love's Widowhood*, is already known to readers of verse. The general title, however, under which these poems are here grouped with a special fitness, as I trust I shall succeed in showing —seems to provide a natural occasion for offering some remarks upon the distinctive English note in our poetical literature.

We have all heard a certain criticism upon Goethe, emanating from a very high quarter, and depreciating him as an intellect essentially provincial, engaged in the effort to become universal. Into the question as to what degree, or whether any degree, of truth be contained in that

verdict there is no need here to enter, but I suppose it will be generally admitted that any deliberate and self-conscious effort after universality of temper and viewis the one hopelessly ill-fated means towards such an end. Indeed it would often seem as if the opposite method were more auspicious. To be frankly local, in the sense in which Burns and Béranger-yes, and one may add Homer and Virgil-are local, has not seldom been a direct road into "the general heart of men." Dante, the poet of a city, a church, a political faction, and a but newly consolidated language, would appear to have done his best to de-universalise himself; and we know with what splendid unanimity the world has baffled that design. And so it seems to me that one who is in the main content to be the singer of the most majestic empire known to history does not thereby circumscribe himself quite so narrowly as that school of theorists would persuade us, in whose eyes the imperial sentiment is a stumbling-block to the poet, and a doctrinaire cosmopolitanism the only rational literary faith.

A nobly filial love of Country, and a tenderly passionate *love of the country*—these appear to me the two dominant notes of this volume. The phrases themselves stand for things widely different, but it seems fated that
