of Medicine

This Volume is Lovingly Dedicated by
The Author.

PREFACE.

It has been the author's aim in the succeeding pages to present in concise form a Monograph on the Diseases of the Nose and Throat especially adapted to the needs of the student and the general practitioner.

The book is the outcome of an experience in the general practice of medicine which was not small, supplemented by several years of exclusively nose, throat and ear work. During the last five years I have been in almost daily contact with students, in the capacity of teacher, and have especially felt the need of a condensed work on the subject dealt with.

Few general practitioners have either the time or the inclination to wade through a volume on rhinology and laryngology which deals with exhaustive details, though a working knowledge of the diseases of the nose and throat is absolutely essential to the successful physician. I have, therefore, kept constantly in mind these two classes of readers.

Only enough anatomy and physiology is given to enable the reader to comprehend the text.

I have especially endeavored to emphasize throughout the work the necessity of treating the patient in his

totality. It has, however, been my aim to impress on the reader the fact, that many diseased conditions met with in the nose and throat demand for their relief approved surgical treatment in addition to internal medication. Neither local nor general measures should, in my opinion, be used to the exclusion of the other.

To only a limited extent do I lay claim to originality. In a monograph frequent reference to the authors consulted is impossible. I have freely availed myself of many of the works printed in the English language on diseases of the nose and throat, and of the journals devoted to this subject.

GEORGE H. QUAY.

Cleveland, O., October, 1896.

CONTENTS.

CHAPTER I.	
Anatomy and Physiology.	PAGE. 17-21
CHAPTER II.	
Method of Examination	22-28
CHAPTER III.	
Acute Catarrhal Rhinitis; Simple Chronic Rhinitis; Hypertrophic Rhinitis; Atrophic Rhinitis; Strumous Rhinitis of Children	29-60
CHAPTER IV.	
Epistaxis	61-67
CHAPTER V.	
Syphilitic Rhinitis	68-75
CHAPTER VI.	
Tumors of the Nose; Nasal Polypus; Papillomata; Cysts; Chondromata; Osteomata; Sarcoma; Carcinoma . .	76-89
CHAPTER VII.	
Deformities and Diseases of the Nasal Septum; Devia- tion of the Septum; Perforation of the Septum; Hæmatoma; Abscess.	90-98
