THE PRODUCTION OF WEALTH

255956

CONTENTS OF BOOK III.

THE PRODUCTION OF WEALTH.

CHAPTER I.

THE MEANING OF PRODUCTION.

SHOWING THE MEANING AND PROPER USE OF PRODUCTION.

	PAGE
Production a drawing forth of what before exists—Its difference from creation—Production other than of wealth—Includes all stages of bringing to be—Mistakes as to it	323

CHAPTER II.

THE THREE MODES OF PRODUCTION.

SHOWING THE COMMON CHARACTER, YET DIFFERENT MODES OF PRODUCTION.

Production involves change, brought about by conscious will—Its three modes: (1) adapting, (2) growing, (3) exchanging—This the natural order of these modes	327
--	-----

CHAPTER III.

POPULATION AND SUBSISTENCE.

SHOWING THAT THE THEORY OF A TENDENCY IN POPULATION TO INCREASE FASTER THAN SUBSISTENCE HAS PREVIOUSLY BEEN EXAMINED AND CONDEMNED.

The Malthusian theory—Discussed in "Progress and Poverty" .	333
---	-----

CHAPTER IV.

THE ALLEGED LAW OF DIMINISHING RETURNS
IN AGRICULTURE.

SHOWING WHAT THIS ALLEGED LAW IS.

	PAGE
John Stuart Mill quoted as to the importance, relations and nature of this law—The <i>reductio ad absurdum</i> by which it is proved—Contention that it is a misapprehension of the universal law of space	335

CHAPTER V.

OF SPACE AND TIME.

SHOWING THAT HUMAN REASON IS ONE, AND SO FAR AS IT
CAN GO MAY BE RELIED ON.

Purpose of this work—Of metaphysics—Danger of thinking of words as things—Space and time not conceptions of things, but of relations of things—They cannot, therefore, have independent beginning or ending—The verbal habit which favors this idea—How favored by poets and by religious teachers—How favored by philosophers—Of Kant—Of Schopenhauer—Mysteries and antinomies that are really confusions in the meaning of words—Human reason and the eternal reason—Philosophers who are really word-jugglers	339
--	-----

CHAPTER VI.

CONFUSION OF THE SPACIAL LAW WITH AGRI-
CULTURE.

SHOWING THE GENESIS OF THIS CONFUSION.

What space is—The place to which man is confined—Extension a part of the concept, land—Perception is by contrast—Man's first use of land is by the mode of adapting—His second, and for a long time most important, use is by growing—The third, on which civilization is now entering, is exchanging—Political economy began in the second, and growing still attracts most attention—The truth and error of the Physiocrats—The successors of Smith, while avoiding the error of the Physiocrats, also ignored their truth; and with their acceptance of the Malthusian theory, and Ricardo's explanation of rent as relating to agricultural land, they fell into, and have continued the habit of treating land and rent as agricultural—Difficulty of the single tax in the United States	351
--	-----

CHAPTER VII.

THE RELATION OF SPACE IN PRODUCTION.

SHOWING THAT SPACE HAS RELATION TO ALL MODES OF PRODUCTION.

	PAGE
Matter being material, space must have relation to all production—This relation readily seen in agriculture—The concentration of labor in agriculture tends up to a certain point to increase and then to diminish production—But it is a misapprehension to attribute this law to agriculture or to the mode of growing—It holds in all modes and sub-divisions of these modes—Instances: of the production of brick, of the mere storage of brick—Man himself requires space—The division of labor as requiring space—Intensive and extensive use of land	367

CHAPTER VIII.

THE RELATION OF TIME IN PRODUCTION.

SHOWING THAT ALL MODES OF PRODUCTION HAVE RELATION TO TIME.

Difference between apprehensions of space and time, the one objective, the other subjective—Of spirits and of creation—All production requires time—The concentration of labor in time	365
--	-----

CHAPTER IX.

COÖPERATION—ITS TWO WAYS.

SHOWING THE TWO WAYS OF COÖPERATION.

Coöperation is the union of individual powers in the attainment of common ends—Its ways and their analogues: (1) the combination of effort; (2) the separation of effort—Illustrations: of building houses, of joint-stock companies, etc.—Of sailing a boat—The principle shown in naval architecture—The Erie Canal—The baking of bread—Production requires conscious thought—The same principle in mental effort—What is on the one side separation is on the other concentration—Extent of concentration and specialization of work in modern civilization—The principle of the machine—Beginning and increase of division of labor—Adam Smith's three heads—A better analysis.	371
