OUTLINES OF PHYSIOGRAPHY

THE

MOVEMENTS OF THE EARTH

BY

Sir J. NORMAN LOCKYER, F.R.S.

CORRESPONDANT OF THE INSTITUTE OF FRANCE, FOREIGN MEMBER OF THE ACADEMY OF THE LYNCEI OF ROME, ETC., ETC.

PROFESSOR OF ASTRONOMICAL PHYSICS IN THE NORMAL SCHOOL OF SCIENCE, AND EXAMINER IN PHYSIOGRAPHY FOR THE SCIENCE AND ART DEPARTMENT

London

MACMILLAN AND CO.

AND NEW YORK

1887

RICHARD CLAY AND SONS,
LONDON AND BUNGAY

Received 10-29-37

CONTENTS.

CHAPTER I.

THE MEASUREMENT OF ANGULAR SPACE.

	PAGE
Introductory	1
Circles and Angles	2
The Use of Angular Measurement	4
Altitude and Azimuth	6
Tycho Brahe's Instrument	9
Improved Methods of Pointing	10
Introduction of Optical Principles	15
How Optics enable us to read fine Verniers	18
Action of a Convex Lens	18
The Achromatic Lens	22
The Telescope	23
How Optics enable us to replace the Vernier by a Micrometer	25
A Lamp Demonstration	27

CHAPTER II.

THE MEASUREMENT OF TIME.

Early Methods	31
Galileo and Huyghens	34
The Modern Clock	37
The Chronometer	40
The Chronograph	42

CHAPTER III.

OBSERVING CONDITIONS.

PAGE

The Earth is a Sphere 47
Its Size 49
Parallax 50
The Earth in Space 52
Experiments with a Globe 53
The Sphere of Observation 57

CHAPTER IV.

THE ROTATION OF THE EARTH.

How the Rotation has been demonstrated 59
Foucault's Suggestions 62
The Facts observed with Pendulums 64
The Gyroscope 67
Study of the Earth's Rotation 71
The Transit Instrument and Sidereal Clock 72
The Apparent Diurnal Movements of the Stars due to the Earth's Rotation 76

CHAPTER V.

THE EARTH'S REVOLUTION.

The Apparent Annual Movements of the Stars 79
These are due to a yearly Revolution of the Earth round the Sun 81
Dr. Bradley's Observations 82
Some Illustrations and a possible Explanation 83
Measurement of the Velocity of Light 87
Statement of the Phenomena actually observed 93
How the Aberration Constant enables us to determine the Distance of the Sun 95

CHAPTER VI.

CONDITIONS OF REVOLUTION.

PAGE
Form of the Orbit 97
Perihelion and Aphelion Points 100
The Earth moves with varying Speed 101
The Plane of the Ecliptic 104
The Axis of Rotation inclined to the Plane of the Ecliptic 106
Nodes. 109
The First Point of Aries 110

CHAPTER VII.

RESULTS OF ROTATION AND REVOLUTION.

Day and Night 112
Sun Time 113
Effect of unequal Motion 115
Effect of Inclination of Fundamental Planes 116
Equation of Time 118
Mean Time 121
Variation in the Length of the Day 122
The Seasons. 123
Precession and Nutation 124
The Tropical, Anomalistic, and Civil Years 129
