Explosives Service

FOR more than 120 years it has been the constant aim of the du Pont Company to deliver explosives where they are needed—*when* they are needed. Today this aim has been achieved by a system of mills and magazines, strategically located near practically every great industrial district.

* * * * *

Prompt delivery is but one factor of du Pont service. We aim to see that our customers use the kind of explosives that will give the best results for their particular work at least expense—and that they are handled, stored and used most efficiently.

* * * * *

In short, du Pont service is the result of a sincere effort on the part of the du Pont Company to meet and follow the demand, and to pass on to the users of their products, in a practical way, the results of their 120 years of experience and research in the manufacture and use of explosives.

FARMERS' HAND BOOK OF EXPLOSIVES

1. The first part of the document discusses the importance of maintaining accurate records of all transactions and activities. It emphasizes that proper record-keeping is essential for transparency and accountability, particularly in the context of public administration and government operations. This section also highlights the role of technology in streamlining record management processes and reducing the risk of data loss or corruption.

2. The second part of the document focuses on the implementation of robust internal controls and risk management frameworks. It outlines the need for regular audits and assessments to identify potential vulnerabilities and ensure that organizational policies are effectively enforced. This section also discusses the importance of employee training and awareness programs to foster a culture of integrity and ethical conduct.

3. The third part of the document addresses the challenges of data security and privacy protection in the digital age. It provides guidance on how to safeguard sensitive information from unauthorized access, disclosure, or misuse. This includes recommendations for implementing strong encryption protocols, access controls, and incident response plans to mitigate the impact of potential security breaches.

4. The fourth part of the document explores the role of external stakeholders and the public in ensuring transparency and accountability. It discusses the importance of open communication, timely disclosure of information, and the establishment of effective grievance mechanisms. This section also highlights the need for regular engagement with citizens and the media to build trust and confidence in the organization's operations.

5. The fifth and final part of the document provides a summary of the key findings and recommendations. It reiterates the importance of a holistic approach to governance, one that integrates ethical values, sound financial practices, and effective communication. The document concludes by expressing a commitment to continuous improvement and the pursuit of higher standards of transparency and accountability in all future endeavors.

The Function of Explosives in Agriculture

For many years lands were cleared, drained and tilled entirely by human labor and hand or horse-driven implements, but recently large tracts have been brought under cultivation much more quickly than was once thought possible by the employment of two new agents—explosives for clearing and draining and motor-driven machinery for preparing and tilling the soil. For farming on a large scale motor equipment is now considered essential, and explosives are recognized as efficient and economical both for the development of new lands and for the improvement of existing farms. Some of the purposes for which explosives may be advantageously employed in agriculture, the particular explosives adapted to these purposes, and the methods of using them are the subject of this book.
