# Eventually The Industrial Public Why Not Now?

Being a part of Evolution, the Industrial Public will come, sooner or later, whether we will or no.

You may retard its coming, but, like Truth, if Crashed to Earth, it will Rise Again.

The combined efforts of a few hundred Earnest Workers can hasten its coming. Will you be one of the few hundred?—(one of "The Four Hundred")?

Those who become convinced that the Industrial Public is founded on right principles and desire to help practicalize it are invited to send for an application blank for membership, enclosing one dollar to help pay for the services of a typewriter, printed matter, stationery, postage, etc. When a sufficient number of applications have been received to make a good start, the applicants will be called together in convention to get acquainted and organize.

CHAPTER III	
Land, Labor and Currency.....	38 to 47
CHAPTER IV	
Changes, Economics and Advantages of the Industrial Public System.....	48 to 51
CHAPTER V	
Socialism and the Single Tax.....	52 to 58

## INTRODUCTION.

The greatest need of Humanity in this, the World's greatest reconstruction period, is a practical plan of Associative life and industry—one that will eliminate every present-day evil, secure every human right, and supply every human need. To present such a plan is the object of this little work.

No one reform can cure all the ills with which humanity is afflicted; nothing but an entire new set of institutions, from A to Z, can do that.

We must commence with the right relation of the sexes, so that no more weaklings or criminals will be born. All children must receive proper care, education and training, to insure their being useful members of Society, instead of dangerous ones.

Private ownership and control of the land, and all other resources of Nature must be abolished, and public control for the benefit of all must be established. Collective ownership, by the workers, of the facilities of production, enabling them to employ themselves, must supplant Corporate or Trust ownership. A new labor currency, issued directly to the producers, for service rendered, must take the place of the present fictitious monetary system.
