Looking for Insects

“Let’s go on a field trip, Miss Adams,” said Susan. “Let’s look for things.”

“We’ll take Jane with us,” said Nancy. Jane was a new girl in school.

“Jane doesn’t know what fun field trips are,” said Susan. “We look for things, Jane. We look for flowers and leaves and animals.”

“Let’s look for insects today,” said Bob. “Our garden is full of insects.”

“We’ll take some glass jars. We can put insects into the jars,” said Jimmy.

Miss Adams and the children were soon in Bob's garden.

"I see a butterfly!" shouted Jimmy. "A butterfly is an insect."

"I see it, too," said Susan. "And it's a Monarch butterfly! It looks just like the one we had in school last year."

"Isn't it pretty!" said Jane.

Nancy told Jane about the Monarch butterfly. "We had one last year. It came out of a chrysalis. The chrysalis was green. It was beautiful."

"The Monarch butterfly flew South for the winter," said Bob. "All Monarch butterflies fly away in autumn."

“B-z-z-z-z-z!” Something flew around Bob’s head. “It’s a bee!” he cried. “A bee is an insect, too!”

“There are lots of bees,” said Susan. “They are buzzing around the flowers.”

“The bees are getting food from the flowers,” said Miss Adams. “They will make it into honey. They will put it into a hive. The hive is their home.”

“Do they stay in the hive all winter?” asked Jimmy.

“Some of the bees die before winter comes,” said Miss Adams. “The others stay in the hive all winter. They will eat the honey in the winter.”
