'WINDOLITE'

SUPERSEDES GLASS FOR EVERY OUTDOOR STRUCTURE

WHY continue using old-fashioned clumsy garden frames, when 'Windolite' frames are much lighter, stronger, and easier to handle? All plants grow under 'Windolite' as well as under glass. Equally suitable for verandahs, skylights, poultry and greenhouses, cloches, and protection of all seedlings.

'Windolite' is a specially-prepared, high-grade composition reinforced with rustless wire; it is unaffected by weather conditions, heat or cold, and can be fixed in position by the most inexperienced. It is easily cut with scissors, and needs no putty or glazing. Every estate will find a hundred and one uses for 'Windolite,' and every gardener will quickly appreciate the possibilities of this material for making up light handy frames for protecting seeds, fruit, and vegetables.

Wherever any glass gets broken replace it with 'Windolite.'

Made in five widths, three strengths, clear, or in any colour.

If your local dealer does not stock, send to us for a free sample and price list.
