PREFACE.

THE axiom, "Knowledge is power," is too well known to need comment; and my experience during the last ten years has indelibly impressed upon my mind the direful consequences resulting but too often from want of knowledge on the part of the mother of the minor diseases of the pregnant condition. To impart that knowledge is the chief aim of the following pages; and I have endeavoured to render it with as much simplicity of language and briefness of

expression as possible — in fact, have observed a more than usual brevity.

I wish it to be distinctly understood, that, far from intending the rules and instructions herein inserted to supersede in any degree the advice of the medical attendant, I sincerely hope my observations will sufficiently show how important it is that in all cases his aid should be sought without delay.

14, PROMENADE, CHELTENHAM.
