THE  
MOULDER'S AND FOUNDER'S  
POCKET GUIDE:

A TREATISE ON

MOLDING AND FOUNDRY IN GREEN-SAND, DRY-SAND, LOAM, AND CEMENT; THE  
MOLDING OF BRICKS, PRAKES, MOLLOWS, BOLLOW-WALL, ORNAMENTS, TRIM-  
MERS, MILLS AND BEAVERS; MANUFACTURE OF MOLDING FOR IRON, BRONZE,  
BRASS, AND OTHER METALS; PLASTER OF PARIS, SULPHUR, WAX, AND  
OTHER ARTICLES COMMONLY USED IN CARVING; THE CONSTRU-  
TION OF MELTING FURNACES; THE MELTING AND FOUNDRY OF  
METALS; THE COMPOSITION OF ALLOYS AND THEIR NATURE.

WITH AN APPENDIX

CONTAINING RECEIPTS FOR ALLOYS, BRONZE, VARVURES AND COLOURS FOR CASTINGS,  
AND TABLES ON THE STRENGTH AND OTHER QUALITIES OF CAST METALS.

BY FRED. OVEEMAN,  
MINING ENGINEER,  
AUTHOR OF "THE MANUFACTURE OF IRON," "A TREATISE ON STEEL,"  
ETC. ETC.

*With Sixty-five Wood Engravings.*

## CONTENTS.

### CHAPTER I.

#### MOULDING.

*Materials for Moulding.*—Sand, 14; green-sand, 14; dry sand, 15; core-sand, 16; clay, 17; loam, 18; blackening, coal-dust, black-lead, anthracite, 19; soapstone powder, 20; localities of materials, 21; grind-mills for blackening, 22.

*Tools.*—Flasks or boxes, 23; cranes, 25; small tools, trowels, cleaner, stamper, shovels, sieves, 28; pease-meal, parting-sand, gate-pins, screws, &c., 30.

*Moulding in Green-Sand.*—Moulding of a wheel, 31; filling in the drag-box, 32; the top box, 36; glaze, 38; removing the top box, 38; drawing of the pattern, 39; blackening the mould, 41; pattern fastened to the moulding-board, 43; composition of moulding-sand, 43; general observations, 43; division of labour, 43.

*Moulding in Open Sand.*—Making of the bed, 48; moulding in one box, 50; moulding of a cog-wheel, 52; causes of failures, 57; moulding in more than two boxes, 59; small articles of machinery, 61; ornamental moulding, 62; hollow-ware, 68; small articles, 67; moulding of a coffee-kettle, 68; patterns for hollow-ware, 70.

*Mixed Moulding.*—Moulding in green-sand with dried cores, 73; cores and their use, 74; core-boxes, 75; moulding of a column, 76; making a pipe-core, 80; moulding with plates, 82.

*Dry-Sand Moulding.*—Drying of the mould, 84; glands, 86; vent-

cal castings, 86; moulding of a large pipe, 87; loam core, 88; bay rope, 88; core-iron, 89; making of the core, 89; casting pipes without a core, 93; small ornamental castings, 94; trinkets, 94; moulding a stag, 96; screwing together of ornaments, 99; soldering, 99; brass castings, 99; fine iron castings, 99.

*Loam-Moulding*.—Quality of loam, 101; compounding loam, 101; moulding of simple round forms, 104. *Moulding of a soap-pot*, 104; the core, 105; the thickness, 108; the cope, 108; taking apart the mould, 110; blackwash, 110; gates, 112; gas-pipe, 112; east-gate, 112; covering of the flow-gate, 113; use of the flow-gate, 114; casting by a single gate, 115; gas-pipes, 115.

*Moulding without Thickness*.—A steam cylinder, 116; making of the cope, 117; the steam-ways, 117; cores for the steam-ways, 121; core for the cylinder, 122; sullage pieces, 123; fastening of the cores, 124; burying of the mould, 125; fastening of the exhaust-pipe core, 126; use of chaplets, 126; general remarks on cylinder moulding, 127.

*Irrregular Forms*.—Moulding of a curved pipe, 128; oval forms, 132; bathing-tub, 132; elbow-pipe, 133; complicated forms, 134.

*Moulding of Bronze Ornaments*.—Moulding of statues by the ancient Greeks, 138; French mode of moulding statues, 139; present mode of casting statues, 141; iron statues, 142; bas-reliefs, 142; moulding of bells, 143.

*Metal Moulds*.—The bore of wheels, 146; railroad-car wheels, 146; chilled rollers, 148; casting together of iron and steel, 152; moulds for tin, lead, pewter, zinc, types, &c., 153; mould for copper or brass, 154; plaster of Paris moulds, 155; stereotyping, 156.

*Impressions and Castings*.—Wax, crumbs of bread, sealing-wax, 159; sulphur, 160; glass, 161; clay, artificial wood, 162; plaster of Paris, 163; mould of a coin, 165; mould of a statue, 166; casting of plaster, 172; taking of a mask, 173; sulphur castings, 174; wax castings, sealing-wax, and other casts, 176; elastic mould, 176; alum, saltpetre, moulding of natural objects, 176.

---

## CONTENTS.

## CHAPTER II.

### MELTING OF METALS.

*Iron*.—Qualities of iron: No. 1 iron, 179; No. 2 iron, No. 3 iron, 181; characteristics of foundry pig, 181; mixing of iron, 184; kind of castings, 187; kind of moulds, 188; melting of iron, 188; in the blast furnace, 188; in crucibles, 182; in reverberatories, 196; the cupola, description of, 201; operation in a cupola, 203; pots, 210; blast-machines, 212; fans, 212; hot blast, 217; drying stoves, 217.  
*General Remarks*.—Cleansing of castings, 218; time of casting, 220; cost of moulding and casting, 221; melting of bronze metal, 223; melting of lead, tin, antimony, and brass, 224.

### APPENDIX—RECEIPTS AND TABLES.

*Alloys of Iron*.—Iron and sulphur, iron and carbon, iron and phosphorus, 226; iron and silicon, iron and arsenic, iron and chromium, iron and gold, iron and silver, iron and copper, iron and tin, iron and lead, 227.

*Alloys of Precious Metals*, 228.

*Alloys of Copper*.—Bronze, 228; bell metal, 229; bronze for guns, 229; bronze for statues, 230; bronze of the ancient Greeks, 231; bronze of the Aztecs, speculum metal, speculum metal of Roese's telescope, 232; bronze for medals, bronze imitation of gold, 233.

*Brass*.—Common brass, solder, button-brass, red brass, princes' metal, brass and lead, tempering brass, 234; brass for ship nails, brass for pans and steps, brass and platinum. German silver, Chinese paekfong, argentan for plating, 235; electrum, solder for German silver, copper and platinum, copper and silver, copper and antimony, 236; copper and carbon, copper and phosphorus, copper and arsenic, 237.

*Lead and its Alloys*.—Lead and arsenic, lead and antimony, stereotype metal, fusible metal, 238.

*Tin and its Alloys*.—Tin and lead, pewter, queen's metal, Britannia

- metal, German tin, music metal, antifriction metal, spurious silver, organ-pipes, 239; imitation of diamonds, tin foil, 240.
- Zinc and its Alloys*, 241.
- Bronzing*.—Natural bronze, antique bronze, 241; various colours, 242; bronze paint, 243.
- Gilding of bronze and brass, 243; of iron, 244.
- Tinning of brass, bronze, and copper, 245.
- Zincing of copper or bronze, 245.
- Glazing of castings, enamel, 246.
- Blackening of iron with plumbago, 247; with varnish, 247.
- Grinding and polishing, 248.
- Malleable iron, 248.
- Silvering of iron, 249.
- Table L 250.
- II. 251.
- III. 251.
- IV. 252.
