PREFACE

DURING the last few months, many choice and remarkably preserved examples of the ceramic wares of this section of the Orient have reached our markets, examples distinctive in material, form, and ornamentation. Among these were found certain pieces of more than usual interest, since they provide us with new facts in regard to the dating of certain of these early mediæval ceramic productions. To present these facts as concisely as possible is the purpose of this monograph, which, it may be added, deals with the Muhammedan wares of every section of the Near East, with the single exception of those of Saracenic Spain, so ably treated of by Dr. Van de Put.
