VARIETIES OF APPLE SUITABLE FOR
THE EXPORT TRADE.

BY

WILLIAM A. TAYLOR,
ASSISTANT POMOLOGIST.

WASHINGTON:
GOVERNMENT PRINTING OFFICE.

1898.

LETTER OF TRANSMITTAL.

U. S. DEPARTMENT OF AGRICULTURE,
DIVISION OF POMOLOGY,
Washington, D. C., June 4, 1898.

SIR: I have the honor to recommend that the article entitled "The fruit industry, and substitution of domestic for foreign-grown fruits," contributed by Mr. William A. Taylor, assistant pomologist, for the Yearbook for 1897, be reprinted with the addition of certain tables and discussion of fruit exports which were not included in the Yearbook article, and with "Historical and descriptive notes on ten varieties of the apple suitable for the export trade," as Bulletin No. 7 of this Division. It contains information that has never before been brought together in the form in which it appears, and for which there are frequent inquiries. Moreover, the subject-matter is of such a character as to closely connect it with the work of this office, and its publication in bulletin form will preserve it in our regular series of publications, where it properly belongs.

Very respectfully,

G. B. BRACKETT,
Pomologist.

Hon. JAMES WILSON,
Secretary.

1. The first part of the document discusses the importance of maintaining accurate records of all transactions and activities. It emphasizes that proper record-keeping is essential for ensuring transparency and accountability in financial operations.

2. The second part of the document outlines the various methods and techniques used to collect and analyze data. It highlights the need for consistent and reliable data collection processes to support effective decision-making.

3. The third part of the document focuses on the analysis and interpretation of the collected data. It discusses the various statistical and analytical tools used to identify trends, patterns, and anomalies in the data.

4. The fourth part of the document discusses the importance of communication and reporting in the context of data analysis. It emphasizes the need for clear and concise reports that effectively convey the findings and insights derived from the data.

5. The fifth part of the document discusses the role of technology in data analysis and reporting. It highlights the various software tools and platforms used to streamline the data collection, analysis, and reporting process.

6. The sixth part of the document discusses the importance of data security and privacy. It emphasizes the need for robust security measures to protect sensitive data from unauthorized access and disclosure.

7. The seventh part of the document discusses the importance of data governance and compliance. It highlights the need for clear policies and procedures to ensure that data is collected, analyzed, and reported in a manner that complies with applicable laws and regulations.

8. The eighth part of the document discusses the importance of data quality and accuracy. It emphasizes the need for rigorous data validation and quality control processes to ensure that the data used for analysis is reliable and accurate.

9. The ninth part of the document discusses the importance of data integration and interoperability. It highlights the need for seamless data exchange and integration between different systems and platforms to support comprehensive data analysis.

10. The tenth part of the document discusses the importance of data-driven decision-making. It emphasizes the need for organizations to leverage the insights derived from data analysis to inform their strategic and operational decisions.
