IS  
IT  
NOT  
SO? { That Americans like the best of everything, and when the best costs the least they will buy it without urging.  
The more distinctively American such an article is, the greater will be their pride in it.  
It goes without saying that a full-jeweled watch is worthy of a good case, and that an Encyclopedia should be bound in something more durable than paper covers.  
The **American Annual of Photography** is now in world-wide favor, and commonly spoken of as an "Encyclopedia of Photographic Progress."  
It should be ordered with cloth binding (Library Edition), as it has, both in bulk and importance, outgrown paper covers. Other books, containing no more pages or information, sell for \$3.00. In attractiveness they will not compare with

The Photographic Times Annual for 1891, which is the most profusely and handsomely illustrated Photographic Book ever published.

"It makes this already valuable book simply invaluable."
