SIR W. PETER RYLANDS & STANLEY MACHIN

**THE DOMINION OF
CANADA AS A MARKET
FOR BRITISH GOODS**

TWO BOOKS ON RAILWAYS

BRITISH RAILWAYS & THE GREAT WAR

ORGANISATION, EFFORTS, DIFFICULTIES & ACHIEVEMENTS

By **EDWIN A. PRATT**

Author of "The Rise of Rail Power in War and Conquest, 1853-1914," "A History of Inland Transport and Communications," etc.

Royal 8vo. 1104 + xx pp. Two Vols. Cloth. 42/- net. By post 43/3.

Illustrations, Maps, Diagrams and Reproductions of Historical Posters, etc.

The story told in these two volumes begins with the formation of the Engineer and Railway Volunteer Staff Corps in January, 1865, and the concluding chapter brings it down to the end of the railway-control period on August 15th, 1921, covering, among other matters, the formation of the Ministry of Transport, the dissolution of the Railway Executive Committee, the work of the Rates Advisory Committee, the "White Paper," the Colwyn Committee on Railway Agreements and the passing of the Railways Act, 1921.

"An admirable and most interesting account of the magnificent services rendered by our railway system in the struggle for freedom and of the great part played by our railwaymen of all degrees. It is a record of achievement, the more impressive because it shows that our railways were able to perform their duties with remarkable efficiency before the existence of the huge and costly Ministry of Transport, and that they were rather hampered than helped in their colossal task by various Government Departments."—*Daily Mail*.

A Full Prospectus sent Post Free on Application.

A STORY OF RAILWAY PIONEERS

Being an account of the Inventions and Works of Isaac Dodds and his Son, Thomas Weatherburn Dodds.

By **MAJOR S. SNELL, M.C. (Ex. R.E.)**

With 44 Illustrations and Plans. Foolscap 4to. Cloth. 12/6 net.

The book, which includes chapters on the Stephenson and James Hann, is interesting from a biographical point of view in the light that it throws on the lives of early railway pioneers, of whom so little is known, and as a historical record in its description of the railway in its beginnings. It is the story of an uphill fight and of mechanical and political achievements in the early days which laid the basis for our modern railways and commercial development.

"A clear account of the Dodds' Inventions is here given with many illustrations, supplying a chapter well worth a writing in the history of railway engineering."—*The Times Literary Supplement*.

**THE DOMINION OF CANADA AS
A MARKET FOR BRITISH GOODS**

Published in London (England), 1922

THE DOMINION OF CANADA AS A MARKET FOR BRITISH GOODS

Being a General Survey of the Canadian Market under post-war conditions, from the point of view of the British exporter and of the manufacturer contemplating the development of branch factories overseas ; with special reference to the opportunity created for British competition with American manufacturers as the result of the new United States Tariffs on Canadian exports to that country

WITH INTRODUCTIONS BY
SIR W. PETER RYLANDS

President (1920 & 1921) of the Federation
of British Industries

AND

STANLEY MACHIN

President of the London Chamber
of Commerce

NOTE BY THE PUBLISHERS

The information set forth in this publication has been prepared for us by a gentleman of considerable experience in connection with Canadian trade and commerce, for many years in the service of the Dominion Government, who takes this method of drawing the attention of British firms to the prospective opportunity when trade revives of replacing by British goods much of the vast importation of American manufactures which has hitherto been so prominent a feature in the Canadian market.
