PHILADELPHIA:
FROM THE PRESS OF JOHN F. MURPHY,
227 South Fifth St.

1. The first part of the document discusses the importance of maintaining accurate records of all transactions and activities. It emphasizes that proper record-keeping is essential for transparency and accountability, particularly in financial reporting and compliance with regulatory requirements.

2. The second part of the document outlines the various methods and tools used to collect, store, and analyze data. It highlights the significance of data integrity and security, as well as the need for regular backups and access controls to protect sensitive information.

3. The third part of the document focuses on the role of technology in modern data management. It discusses the benefits of cloud-based solutions, data warehousing, and advanced analytics tools, which enable organizations to gain deeper insights into their operations and make data-driven decisions.

4. The fourth part of the document addresses the challenges associated with data management, such as data silos, inconsistent data formats, and the growing volume of data. It provides strategies to overcome these challenges, including data integration, standardization, and the implementation of data governance frameworks.

5. The fifth part of the document concludes by emphasizing the importance of a data-driven culture. It encourages organizations to foster a mindset where data is used to drive innovation, improve efficiency, and enhance the overall performance of the organization.

PREFACE.

The appended "Historical Genealogy," containing about 130 pages, divided into three principal divisions, and several sub-divisions, was recorded with a view of preserving in condensed and more convenient and enduring form, some items of history and genealogy relating to a branch of the Brown family, and to notices of other families more or less remotely connected therewith by consanguinity or historical association; and especially do we see the importance of securing such information in permanent form, when our researches extend back to days of the primitive settlers and the early existence of the Government of Pennsylvania. Although there are many specimens of careful historical family record, yet in many instances there is serious lack of recorded information relating to family history,

which at the present time might be of much interest and value to many worthy families; much relating to early history is now probably lost beyond recovery, and some of that information which may yet be attainable will probably become more and more difficult of collection, the further we recede from the interesting period occupied by the primitive settlers. These reminiscences may be of some value in future research, and of utility as a book of reference.

It would have been a pleasure to have noticed favorably many of the other members of the families brought into view, but this would have been exceeding the limits assigned to the contents of this brief Historical Genealogy.

If some names have been handled with too much familiarity, or injustice has been done to any, or inaccuracies are manifest, it is to be hoped that all of these defects will be modified at some future period, when this "Historical Genealogy" may be continued by other hands.

A large proportion of this historical pro-

duction was printed and utilized in pamphlet form; the various sections of the whole history are now brought together and embraced in several small volumes, each containing an entire copy of the "Historical Genealogy;" these circumstances may account for some peculiarities in the arrangement of the contents.

1. The first part of the document discusses the importance of maintaining accurate records of all transactions and activities. It emphasizes that this is crucial for ensuring transparency and accountability in the organization's operations.

2. The second part of the document outlines the various methods and tools used to collect and analyze data. It highlights the need for consistent data collection procedures and the use of advanced analytical techniques to derive meaningful insights from the data.

3. The third part of the document focuses on the role of technology in data management and analysis. It discusses how modern software solutions can streamline data collection, storage, and processing, thereby improving efficiency and accuracy.

4. The fourth part of the document addresses the challenges associated with data management, such as data quality, security, and privacy. It provides strategies to mitigate these risks and ensure that the data remains reliable and secure throughout its lifecycle.

5. The fifth part of the document concludes by summarizing the key findings and recommendations. It stresses the importance of continuous monitoring and improvement of the data management process to adapt to changing organizational needs and market conditions.

FIRST DIVISION.

CHAPTER I.

From traditions of the family supported to some extent by documentary evidence, it appears that George Brown and Mercy his wife were among the earliest settlers at the Falls; that they had immigrated from Leicester, England, in the year 1679, and commenced pioneer life, when what is now the State of Pennsylvania was almost an unbroken wilderness. It is recorded of George Brown that he was administering the office of "Justice of the Peace" as early as the year 1680. He possessed a valuable tract of land bordering upon the Delaware River, extending inland to the manor boundary, and also bordering on the possessions of Phineas Pemberton. George Brown was never a member of the Society of Friends,
