INTRODUCTION.

On the appearance of Mr Sweet's Anglo-Saxon Reader in 1876, it occurred to me that an English index (if I may so call it) to the words contained in the admirable Glossary appended to it would be useful, at any rate to myself. In the course of 1878 I made such an index. On looking it over, I at once observed that some very common and characteristic words were wanting in it, on account of the necessarily limited nature of the selections. It then occurred to me that many of these could be readily supplied by help of the index to Mr Sweet's History of English Sounds. I accordingly went through that index, and so filled up some of the gaps. In a very few cases I passed over the words thus indicated, because the word was unimportant or the form a little doubtful.

Hence the present list contains only such English words as occur (1) in the explanations of Anglo-Saxon words in Sweet's Glossary to the Reader (first edition); and (2) nearly all the words given in his History of English Sounds. The result is a vocabulary which gives some account of most of the more important words of the language; and shews, on the one hand, what words are still in use nearly unchanged, and on the other, what ideas are expressed by totally different terms in the modern and in the oldest English.

Limited as is the vocabulary, it has at any rate this advantage, viz. that all the Anglo-Saxon words cited are *rail* ones, for which actual authority can be adduced. The passages in which they occur can be found by the references in the Glossary to the Reader;

INTRODUCTION

or else, when the word is but slightly changed, by reference to the dictionaries of Bosworth, Lye and Manning, or Ettmüller. As it is chiefly in the former case that the construction of the word may require illustration, it is easy to turn to the passages cited and observe any peculiarity of usage. It will at once be seen that, from the way in which the list has been compiled, it is necessarily scanty and imperfect. It is merely a handy list, intended for my own use and for that of a few friends and students.

N.B. When modern English verbs and substantives are not distinguished as such, the verbs may be readily known by the fact that the Anglo-Saxon infinitive mood ends in -an. It may also be noted that additional Anglo-Saxon words may often be found under synonymous English ones. Thus to bid is bebdan; and, by looking under command, we also find hátan.
