INTRODUCTORY NOTE

This catalogue is a compilation of the material collected by the library of the American Institute of Accountants during its first year. The aim has been to provide a survey of books, pamphlets and periodicals, both donated and purchased. It is not a complete or selected bibliography on accounting subjects, and no attempt has been made to include the many clippings and magazine articles.

Names of authors, subjects and titles are arranged in a single alphabet with information as to publisher, place of publication, date and number of pages.

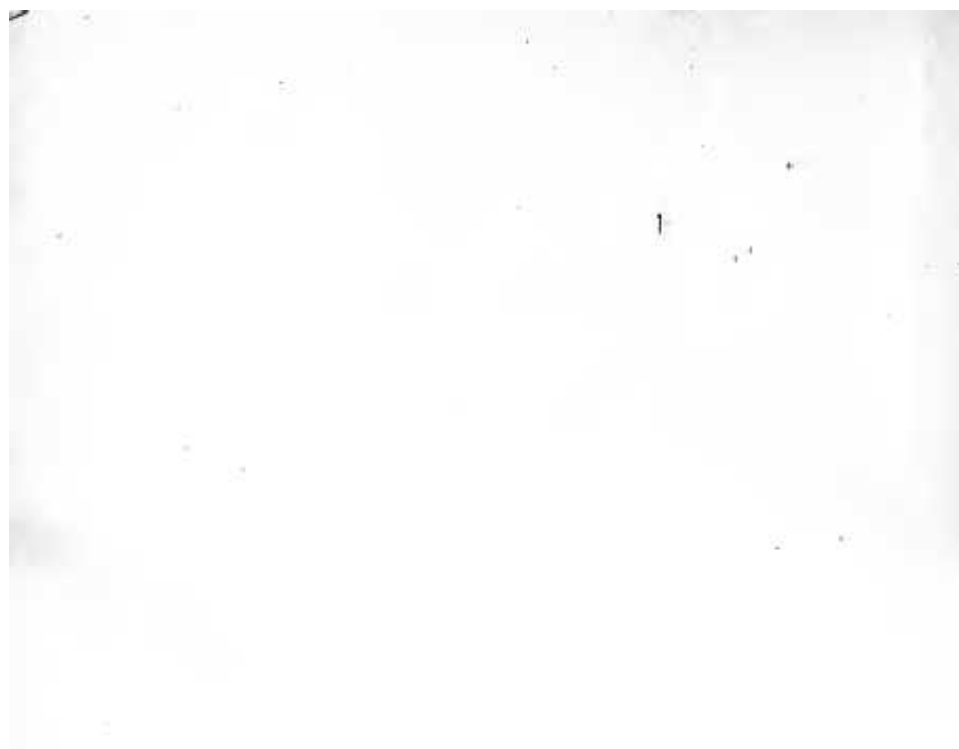

To find books on a certain subject look for that subject as in an encyclopedia, and to find books by a certain author look for that author.

For example, the Interpretations of accounting classifications by the Interstate commerce commission may be found either under the subject, Railroads-Accounting or under the author, United States-Interstate commerce commission.

This catalogue is distributed gratis to all members and associates of the American Institute of Accountants. Extra copies may be obtained from the library of the Institute at \$.50 each.
