P R E F A C E.

THE principal object of the present Catalogue has been to give a complete list of all the known species of Fossorial Hymenoptera, at the same time indicating those at present contained in the Collection of the British Museum.

This Part of the Catalogue contains the MUTILIDÆ and POMPHILIDÆ, and has been prepared by Mr. FREDERICK SMITH, who has taken every care in the determination of the species, in referring to the synonyma, and in the descriptions of those species which appear to have remained hitherto undescribed.

The remaining Parts will follow as soon as they can be completed.

JOHN EDWARD GRAY.

7 March 1855.

CATALOGUE
OF
HYMENOPTERA.

Div. II. ACULEATA.

Tribe 1. HETEROGYNA.

Fam. 2. MUTILLIDÆ.
