PREFACE

The increase in recent years in the amount of sheet asphalt pavement which is being laid in our cities and the extent of the asphaltic concrete and asphaltic broken stone surfaces which are being constructed on our country highways to resist the destructive action of motor vehicles, has created a demand for highway engineers, contractors, and inspectors, who are skilled in this work, far in excess of the supply. The result has been that many have entered these fields who do not realize the importance of careful attention to details which is necessary to insure complete success in this line of work. With a view to supplying the necessary information in regard to these details to the persons who have been mentioned, this pocket-book has been prepared with the hope that it will do something toward insuring better work in the future than has been done in some cases during recent years by inexperienced contractors and engineers, and supervised by inexperienced inspectors. Its form has been selected in order that it may be readily carried in the coat pocket, for reference on all occasions, something that cannot well be done with a larger book with stiff covers.

## CONTENTS

	PAGE
PREFACE . . . . .	v
CHAPTER I	
INTRODUCTORY . . . . .	1
CHAPTER II	
BROKEN STONE . . . . .	5
CHAPTER III	
FOUNDATION . . . . .	8
CHAPTER IV	
THE INTERMEDIATE COURSE . . . . .	16
Sheet asphalt pavements—Open binder—Close binder —Asphaltic concrete as a wearing surface—Asphaltic broken stone and asphaltic concrete country highways.	
CHAPTER V	
THE MINERAL AGGREGATE . . . . .	25
Sheet asphalt surfaces—Sand—Aggregate containing fine stone.	
CHAPTER VI	
FILLER OR DUST . . . . .	35
CHAPTER VII	
NATIVE BITUMENS . . . . .	39
Physical properties—Chemical characteristics—Trinidad lake asphalt—Refined Trinidad asphalt—Bermudez asphalt.
