CHEMIST'S REPORT

The ever-increasing desire on the part of the public to secure definite knowledge relative to its food supply has resulted in an ever-increasing amount of work for this department.

We believe this desire points unerringly toward the time of better foodstuffs, and that the tide is setting in the right direction is evidenced by the demand for information—not about the bad—but rather about the good.

The public interest seems centered more upon hearing the name and maker of an honest brand of goods, than in knowing what the dishonest brand contains.

Rather than give space to describing the many harmful preservatives and adulterants found in foodstuffs during the past year, we prefer to submit a detailed list of high grade, pure, honest, food products that are worthy of honorable mention.

It must be distinctly understood that this list does not represent all pure foods, although it covers almost all advertised brands of foods having national distribution.

It is the beginning of what we hope will some day result in a complete classification of all foods sold.

WESTFIELD BOARD OF HEALTH,

L. B. ALLYN, Chemist.

Westfield, Mass.
November, 1919.
