AN INTRODUCTION TO
THE DIFFERENTIAL
AND
THE INTEGRAL
CALCULUS

BY

THOMAS HUGH MILLER, B.A. CANTAB.

FORMERLY SCHOLAR OF PETERHOUSE

MATHEMATICAL LECTURER AT BOROUGH ROAD TRAINING COLLEGE

PERCIVAL AND CO.

KING STREET, COVENT GARDEN, LONDON

1891

Figure 1. Relationship between the number of children and the number of parents.

Grad. 3
Prof. W. W. Beman
10-15-1923

11 Dec. 23. E.H.H.

NOTE

THIS volume is intended to meet the demands of Teachers and Students, who begin the study of the Calculus before Analytical Geometry. It assumes a knowledge of Elementary Algebra, and Trigonometry as far as the properties of plane triangles. The examples include all those on the subjects treated, set in the South Kensington Examinations of recent years.

T. H. M.

BOROUGH ROAD TRAINING COLLEGE,
ISLEWORTH, May 1891.

CONTENTS

	PAGE
CHAPTER I.	
Definitions—Function—Continuous Function—Limit—Differential Coefficient,	1
CHAPTER II.	
Differential Coefficients of the elementary functions—of the sum and the product of two functions—of the inverse trigonometrical functions—of a function of a function—of implicit functions,	6
CHAPTER III.	
Successive Differentiation—Leibnitz's Theorem,	24
CHAPTER IV.	
Taylor's Theorem—Maclaurin's Theorem,	31
CHAPTER V.	
Maxima and Minima Values of a function of one variable,	38
CHAPTER VI.	
Evaluation of Indeterminate Expressions,	43
