NATURAL PHILOSOPHY

FOR

BEGINNERS.

SECOND EDITION, IMPROVED.

ADVERTISEMENT
TO
THE SECOND EDITION.

In this Edition many important corrections have been made, and some parts re-written. The arrangement adopted is the same as that of the first edition; as it was thought, that any departure from the original plan might occasion inconvenience in those schools in which the first edition has hitherto been used.

MAY 1845.

CONTENTS.

	PAGE
INTRODUCTION	xi

CHAPTER I.

Inertia.—Matter incapable of spontaneous change.—Familiar Examples of Inertia.—Force.—Resistance.—Various kinds of Motion.—Momentum	1
---	---

CHAPTER II.

<i>The First Law of Motion</i> —Free Motion straight as well as uniform.—Centripetal Force.—Centrifugal Force.—The Planets illustrations of Circular Motion.—Familiar Examples of Centrifugal Force.—Matter unable of itself to change the Direction of Motion	8
--	---

CHAPTER III.

<i>The Second Law of Motion</i> —Experimental Illustration of the <i>Parallelogram of Forces</i> .—Familiar Examples of Compound Motion.—Components and Resultants.—Machine for illustrating Compound Motion.—Examples of the Composition and Resolution of Force.—Boat acted upon by the Wind and Tide.—Motions of Fishes.—Flight of Birds.—Equestrian Feats.—Importance of a Knowledge of the Composition and Resolution of Force.— <i>The Third Law of Motion</i> .—Familiar Examples of Action and Reaction.—Percussion of Inelastic Bodies.—Percussion of Elastic Bodies	12
---	----

CHAPTER IV.

	PAGE
Gravity.—Weight.—Phenomena of Falling Bodies.—Example of Guinea and Feather.—Increased Velocity of Falling Bodies.—Uniformly accelerated motion.—Atwood's Machine.—Gravity acts upon all bodies at all times.—Examples.—Application of the Laws of Falling Bodies to ascertain the depth of a Well.—Familiar Illustrations of accelerated Velocity.—The Battering-ram.—An Engine for driving Piles.—Bodies uniformly retarded by the force of Gravity in their Ascent.—The Pendulum.—Isochronism.....	34

CHAPTER V.

Curvilinear Motion.—Water issuing from a hole in a Cask.—Projectile Force.—Ball shot from a Cannon.—Parabola.....	48
---	----

CHAPTER VI.

Centre of Gravity.—Line of Direction.—Examples.—Centre of Gravity sometimes the Centre of Magnitude or Dimension.—Method of finding the Centre of Gravity.—Leaning Towers.—Examples of the Line of Direction.—Illustration of raising the Centre of Gravity.—Wagon on Inclined Road.—Examples of lowering the Centre of Gravity.—Bucket.—Vibrating Figures.—Familiar Examples.—Motion of a Quadruped.—Rope-dancers.—Centre of Gravity not always within the Body.—Motion on Inclined Plane.—Mechanical Deceptions of Cylinder and Double Cone.—Spinning-top.—Oval Bodies.—Stability of a Body.—Pyramid.—Method of finding the Centre of Gravity of Squares, Parallelograms, and Circles.—The Centre of Gravity also the Centre of Inertia.—Examples.—Centre of Gravity of three or more bodies.—Triangle.....	51
---	----

CHAPTER VII.

	PAGE
The Mechanical Powers.— <i>First Kind of Lever</i> .—Law of Virtual Velocities.—Mechanical efficacy of a Machine.—Saw.—Handspike or Crowbar, &c.—Balance.—Steel-yard.—Chinese Steel-yard.—Danish Balance.—Apparatus for making Experiments upon the Lever.—Easy Exercises.— <i>Second Kind of Lever</i> .—Sedan-Chair.—Cask slung from a Pole.—Cutting-knife.—Door turning upon its hinges, &c.— <i>Third Kind of Lever</i> .—Foot-board of the Turning-lathe.—Limbs of Animals.—Sheep-shears, &c.—The difference between Levers of the Second and third Kind.— <i>The Compound Lever</i> .—Familiar Examples.— <i>The Bent Lever</i> .—Various Examples.—Illustration of Oblique Action of the Power and Weight.—Rectangular Lever.—Bent Lever Balance.—Beam supported upon two Fulcrums.	65

CHAPTER VIII.

The Wheel and Axle.—Wheel and Compound Axle.—Section of this Machine.—Exercises.—Ratchet Wheel.—Virtual Velocities.—Various Applications of the Wheel and Axle.—Capstan.—Compound Wheel-work.—Illustration.—Straps or Cords.—Watch and Clock-work.—Action of the Fusee.—Water-wheels.—Overshot Wheel.—Undershot Wheel.—Breast Wheel.—Windmills.—Horse Power.—Cranes.—Circular Cages.—Treadmill.—Roasting-jack.—Extensive use of the Wheel and Axle.	97
--	----

CHAPTER IX.

The Pulley or Cord.— <i>The Fixed Pulley</i> .—Familiar Examples.— <i>Movable Pulleys</i> .—Oblique Direction.—Examples of Pulleys with a single rope.—Pulleys used on board of Ships.—Smeaton's Pulley.—White's Pulley.—Spanish Bartons.—Examples of Pulleys with several ropes.—Virtual Velocities.—Friction Rollers.	116
--	-----
