PREFACE TO THIRD EDITION

A DEMAND for a third edition of this small work so soon after the second edition (1916) shows that it is of use to those for whom it is intended. I have incorporated a number of additional clinical points in it, and have added a new chapter on the General Physical Signs and Symptoms of Heart Disease. A Plate with diagrams of a few special pulse tracings has been also added. I hope that the practical value and interest of the book will be correspondingly increased.

E. M. B.

MANCHESTER, 1917.

PREFACE TO FIRST EDITION

(ENTITLED "HEART SOUNDS AND MURMURS, THEIR CAUSATION AND DIFFERENTIATION")

IN this small work I have attempted to put simply, clearly and in convenient pocket-book form for clinical reference the elements of cardiac auscultation for the use of students. I have repeated myself a good deal with the object of making an argument or explanation as complete as possible in the one place and thereby of avoiding turning backwards and forwards.

E. M. B.

MANCHESTER, 1911.

CONTENTS

SECTION	PAGE
I. PRELIMINARY CONSIDERATIONS - - - Anatomy and Physiology—Dextrocardia.	1
II. ROUTINE EXAMINATION - - - What patients complain of—The arterial pulse: how to feel it: varieties: tension: wall of artery—Venous pulse—Inspection of patient: general: the neck: the præcordia: the epigastrium: the abdomen—Palpation: cardiac impulse and apex-beat: dextrocardia—Percussion: routine method: cardiac dullness—Auscultation.	6
III. THE HEART SOUNDS - - - The first sound and its variations—The second sound and its variations—Rhythm of sounds: tic-tac rhythm: cantering rhythm, bruit de galop.	32
IV. HEART MURMURS - - - Timing—Changes in the valves which lead to murmurs: obstruction: incompetence—Physical causes: fluid veins: vibration of curtains: blood changes, hæmic murmurs—Changes in the different valves which cause murmurs: auriculo-ventricular valves, stenosis, dilatation, ulceration; semilunar valves—Crescendo murmur—Murmurs with heart sounds—Absence of heart sounds with normal valves—Influence of mobility of curtains on sounds.	51
V. AREAS OF AUDIBILITY OF HEART MURMURS - Situation of valves—Influence of change of position on murmurs.	68
VI. CONDUCTION AND TRANSMISSION OF MURMURS Conduction—Transmission.	17
VII. SPECIAL CHARACTERISTICS OF THE DIFFERENT VALVULAR MURMURS - - - Mitral murmurs—Rheumatism in childhood: chorea: nodules—Crescendo murmur—Tricuspid murmurs—Aortic murmurs—Posture murmur—Pulmonary murmurs—Murmurs in tachycardia.	75

SECTION	PAGE
VIII. GENERAL PHYSICAL SIGNS AND SYMPTOMS OF HEART DISEASE - - - -	95
Condition of heart muscle: cardiac hypertrophy or compensation: cardiac dilatation: acute cardiac muscle failure: chronic cardiac muscle failure: valvular disease, tricuspid, mitral, aortic, pulmonary valves.	
IX. HÆMIC MURMURS - - - -	113
Cardiac—Vascular: bruit de diable.	
X. EXOCARDIAL SOUNDS - - - -	115
Pericardial—Cardio-respiratory—Tachycardia murmurs.	
XI. SEPTIC ENDOCARDITIS, PERICARDITIS, ANGINA PECTORIS - - - -	117
Septic, malignant, or ulcerative endocarditis—Pericarditis, simple, serous, purulent—Adherent pericardium—Angina pectoris.	
XII. CARDIAC IRREGULARITY RESULTING FROM DISTURBANCES OF STIMULATION - - -	122
Electrocardiogram—Tachycardia: apprehensive heart: murmurs—Paroxysmal tachycardia—Slow pulse: bradycardia—Heart-block: digitalis—Irregular or intermittent pulse: premature systole, extra systole—Sinus arrhythmia—Auricular fibrillation—Auricular flutter.	
XIII. TREATMENT OF CARDIAC DISEASE - - -	132
Before muscle failure: general: diet: exercise: drugs—Cardiac muscle failure: rest in bed: diet: sleep: drugs—Drugs acting on the heart muscle: digitalis: strophanthus: caffeine: strychnine—Vessel dilators—Treatment of special forms of heart disease: mitral valve: aortic valve: alcoholic heart failure: angina pectoris—Acute endocarditis, myocarditis, pericarditis.	
INDEX - - - -	144
