HARVARD BUSINESS SCHOOL

P R E F A C E.

THIS book is intended to give beginners an insight into the simple theory and arrangement of the Steam Engine. It has been the chief aim of the writer to make the subject as easy, practical, and perspicuous as possible, by omitting whatever is dry in theory, if not absolutely requisite, or likely to puzzle and confuse.

The author has keenly felt that a work of this kind was greatly wanted, and it has been his endeavour to supplement the design of the Publishers, in seeking to occupy a foremost place in supplying, in the best manner possible, the want so widely felt, so as to bring the Series of Text-Books, of which this volume forms one, within easy reach of every Student of Science in the Kingdom.

H. E.

January, 1873.

CONTENTS.

CHAPTER I.

HEAT.

	PAGE
Definition—Expansion of Bodies by Heat—The Liquid and Gaseous States of Matter—Co-efficient of Expansion—Energy of Atomic Forces—Practical Illustrations—Temperature of Bodies, and Instruments for Measuring Temperature—Thermometers—Comparison of Thermometers—Graduation of Thermometers—Pyrometers—Capacity for Heat of Bodies—Calorimeter—Conversion of Heat into Work and Work into Heat—Consumption of Heat in Liquefaction and Vaporisation—Convection of Heat—Methods by which a Large Mass of Water may become Heated—Conduction of Heat—Good and Bad Conductors—Experimental Illustrations,	9

CHAPTER II.

STEAM, SALT WATER, AND INCrustATIONS.

The Formation of Vapour and Steam—Boiling Point of Fresh and Salt Water—Analysis—The Causes which Influence the Boiling Temperature of Water—High Pressure Steam—Measure of Steam Pressures by Atmospheres—Steam when in Contact or not in Contact with Water—The Relation between Pressure, Density, and Temperature of Steam—Specific Gravity of Steam—Quantity of Water required to produce Condensation—Common and Superheated Steam—Analysis of Sea Water,	31
---	----

CHAPTER III.

RADIATION, OXIDATION, ETC.

	PAGE
The Radiation of Heat—The Absorption of Heat—Reciprocity of Radiation and Absorption—Good and Bad Radiators—Experimental Illustrations—Oxidation of Metals—Effects of Galvanic Action,	41

CHAPTER IV.

THE ENGINE BEFORE WATT, AND WATT'S ENGINE AND IMPROVEMENTS.

Savary's Engine—Newcomen's Atmospheric Pumping Engine—Its Defects—The Discoveries of Watt—The Separate Condenser—The Expansive Working of Steam—Its Economy—Its Value in Regulating the Power of an Engine—Details connected with Watt's Single Acting Pumping Engine—The Steam Cylinder—Valves connected with Cylinder and their Action—The Condenser—The Air Pump—The Foot Valve—The Delivery Valve—The Snifting Valve—The Hot Well—The Piston-Rod—Connecting Rod and Crank—Stuffing Boxes and Glands—Parallel Motion—Method of Starting the Engine and of Regulating its Speed by the Governor—The Throttle Valve—The Cataract—Eccentric,	45
--	----

CHAPTER V.

BEAM ENGINE AND DETAILS.

Double Acting Condensing Beam Engine—Principle upon which it Works, etc.—Details of the Various Parts—Cylinder—How Constructed—Ports or Openings into the Cylinder, etc.—The Form of Slide Valve in Common Use—The Locomotive or Three-Ported Valve—The Lap on a Valve—The Eccentric—The Lead of a Valve—Cushioning the Steam—Clearance—Details of the Piston—Metallic Packing-Rings—The Expansion Valve and the Gear connected with it—The Supply of Water for Condensation—Blowing-through—Gauges for the Condenser—The Barometer Gauge—Method of Estimating Pressure by it—Errors in this
--

CONTENTS.

7

	PAGE
Method, and Correction of the Same—The Fly Wheel —The Principle of an Equilibrium Valve—The Double Beat Valve—The Crown Valve—The Throttle Valve —The Gridiron Valve—The High Pressure Engine without Condensation—The Expansive Principle as Applied in the Double Cylinder Condensing Engine,	66

CHAPTER VI.

THE MARINE STEAM ENGINE AND DETAILS.

Side Lever Engine—The Oscillating Engine for Paddle Steamers—The Vertical Trunk Engine—The Gorgon Engines—The Object of this Arrangement—Other Forms of Engines—Engines for Screw Propellers— Direct Acting Engines with or without Multiplying Gear—Penn's Trunk Engine—Maudslay and Field's Return Connecting Rod Engine—Details of Parts con- nected with the Working of a Marine Engine—The Air Pump Bucket and Valves—Double Acting Air Pump—India-Rubber Disc Valves—Cylinder Escape Valves—Bilge and Feed Pumps—Expansion Valves— Expansion Cams and Gear,	90
--	----

CHAPTER VII.

THE PADDLE AND SCREW.

Paddle Wheels—Feathering of the Floats—Disconnection and Immersion of the Wheels—The Screw Propeller— Various Forms—Length, Angle, Pitch, and Area of Screw Blade—Disconnecting and Raising the Screw— The Position of the Screw Propeller in the Vessel— The Slip of the Screw—The Method of Receiving the Thrust upon the Vessel—Soft Metal Bearings,	103
---	-----

CHAPTER VIII.

BOILERS AND BOILER GEAR.

The Boiler—Flue or Cylindrical Boiler—Return Flue, Cornish, Lancashire—Length and Diameter of Flues— Thickness of Plates—Internal and External Pressure —Marine, Flue, and Tubular Boiler—Gunboat Boiler —Vertical Boiler—Blast Pipe—Waste Steam Pipe— Steam Chest—Staying Boilers—Fusible Plug—Cloth-
