THE AUTHOR.

PREFACE TO THE THIRD EDITION.

A LITTLE over a year has passed since this book appeared, and a third edition has become necessary. In this I have made a number of alterations and additions. Some of the methods of preparing nutritive-media have been simplified, while others have been described more in detail. The methods of staining have been revised, and a number of facts bearing on septic and specific organisms, gained during the past year or two, have been added. I trust that this revision will add to the value of the work.

E. KLEIN.

November, 1885.
