PREFACE.

IN presenting a Second Edition of this work to the notice of the profession and the public, I have to assure them that it has undergone considerable correction, and that I have brought to bear upon its improvement the knowledge gained by many years experience in the treatment of patients sent to this city for the benefit of the thermal waters.

I have to thank the reviewers of my first edition for their very flattering and favourable notices ; and to express my acknowledgments to various writers on Mineral Springs, both British and Foreign, for the kind manner in which they have done me the honor to speak of my researches.
