TO PROF. EMORY R. JOHNSON.

PREFACE.

In extenuation of some of the more obvious defects and shortcomings of this book, the author desires to state that it is intended in no sense as a complete treatment of the general subject of the passenger traffic of railways. The book was begun in Europe at a time when the author was disposed to advocate a theory which he now considers erroneous. The present book therefore neglects the treatment of certain questions of interest to the American public, and while it contains in part the foundations of a superstructure, since abandoned, the original work has been much curtailed. For any merit which the book may possess, the reader is under obligation to Professor Emory R. Johnson, of the University of Pennsylvania and of the Isthmian Canal Commission, but for whose assistance and encouragement these essays would not have appeared.

CONTENTS.

	PAGE.
CHAPTER I.	
Introduction, Summary and Conclusions	9
CHAPTER II.	
The Effect of Improved Travel upon Society	23
