PREFACE TO THE ENGLISH EDITION

THE great importance of the results obtained by Professor Pawlow, first published in collected form in the Russian language in 1897, was soon recognised by PHYSIOLOGICAL INVESTIGATORS all the world over. Hence the Russian edition was quickly followed by others in German and French.

But the work is of no less value to the PRACTISING PHYSICIAN. To place the matter, therefore, within easy reach of every English speaking medical man it was felt that an English edition was called for.

In carrying this into effect the translator has had the ready permission of Dr. A. Walther, and also of Mr. J. F. Bergmann, to make use of the German text, a kindness which he desires to gratefully acknowledge.

The present edition includes the later work of Pawlow on the Physiology of the Bile, Succus Entericus, and Salivary Secretion, together with more recent notes kindly supplied by the author, thus bringing the whole up to date. It also contains two new figures.

It is to be hoped, therefore, that in its English form the book will be worthy of its distinguished author.

THE TRANSLATOR.
