## FOREWORD

In publishing a fifth edition of the Tuberculosis Directory, it has been considered advisable to make a number of changes from the plan of previous editions. The Directory information, instead of being contained in one bound volume, is presented in pamphlet form as follows:

1. Directory of tuberculosis associations and committees (Pamphlet 110).
2. Directory of dispensaries, clinics and classes for special treatment of tuberculosis (Pamphlet 111).
3. Directory of sanatoria, hospitals and day camps for the treatment of tuberculosis (Pamphlet 112).

The number of associations and committees in this edition is 1030, as compared with 1324 similar organizations listed in the fourth edition, published in 1916. While the number of associations has decreased slightly since 1916, it should be borne in mind that this does not in any way indicate a retardation in the organized campaign against tuberculosis. It is a significant fact that in the last three years the tendency to organize on county lines has been very marked. This means that in many instances the work promoted by two or three or more committees in small towns has been combined into that of a county organization with possibly a paid executive secretary. In New York State, for instance, 472 associations and committees were listed in the 1916 Directory. There are now only 77. Yet the amount of territory covered by organizations that are really active has been enormously increased. In general, the amount of organized territory has been vastly enlarged since 1916 in most, if not in all, of the states. Attention is also called to the fact that there is now an active working state association in each of the 48 states. A large number of county and local associations, which could have been classed as merely "paper" organizations in 1916, are now active twelve months of the year.

It is interesting to note also that many of the associations, especially the state organizations, have shortened their names, just as the National Tuberculosis Association has changed its name from the National Association for the Study and Prevention of Tuberculosis.

Those who use the Directory information will also be interested to know that the latest data obtainable in regard

to all tuberculosis activities is constantly on file in the office of the National Tuberculosis Association. Each institution and association is listed in the card file which is corrected daily. Although the three Directory pamphlets now issued do not contain data in regard to hospitals for the insane and penal institutions having special provision for tuberculosis patients, information regarding all these institutions is on file in the executive office. The calls for such information are somewhat infrequent and are usually requests for technical information not covered in the Directory, and for these reasons it was thought advisable to omit their publication.

The introduction of the 1916 Directory said in regard to open air schools: "The present edition contains mention of more than 300 different institutions, and this section is manifestly incomplete because of the impossibility of collecting information rapidly enough to keep this part of the Directory complete. The open air school has transcended the limits of the anti-tuberculosis campaign, and while its primary development has been due largely to the tuberculosis movement, it is now coming to be more and more a part of the educational movement, where it rightly belongs. The open air school is both an educational and a health measure." Because of this large increase in the number of open air and fresh air schools, some of which are not connected with the tuberculosis movement, it seemed unwise to attempt the publication of a complete list of these schools. For a Directory of these schools and for other information on the subject, correspondence is invited with the Elizabeth McCormick Memorial Fund, 315 Plymouth Court, Chicago.

Information in regard to tuberculosis agencies in Canada may be obtained from the Canadian Association for the Prevention of Tuberculosis, Bank Street Chambers, Ottawa.

For assistance in revising and correcting the Directory material, the National Association is especially indebted to the executive secretaries of the state tuberculosis associations and this opportunity is taken to express the thanks of the National Association to them and to all others who have aided in gathering and revising the information contained in the three Directory pamphlets.

CHARLES J. HATFIELD, M. D.,  
*Managing Director*

August 1, 1919.

**SANATORIA, HOSPITALS, AND DAY CAMPS  
FOR THE TREATMENT OF TUBERCULOSIS IN  
THE UNITED STATES\***

**INTRODUCTORY NOTE**

The institutions are listed alphabetically according to location under their separate states, *the only exception being that the State Sanatoria are listed first in all cases.*

The date in parentheses after the name of a sanatorium indicates, as a rule, the date when the institution was opened. Institutions not yet in operation are so designated.

---

\* Two other directory pamphlets are published by the National Tuberculosis Association:

A Directory of Tuberculosis Associations and Committees in the United States (Pamphlet 110, price, 60 cents).

A Directory of Dispensaries, Clinics and Classes for special Treatment of Tuberculosis in the United States (Pamphlet 112, price, 50 cents).

**ALABAMA****STATE SANATORIUM (Not yet in operation)**

An appropriation of \$40,000 was made by the legislature in 1907. The State Board of Health is working on plans for the opening of a sanatorium on a small scale. It is hoped to have the legislature make increased appropriation this year (1919).

**BIRMINGHAM**

**RED MOUNTAIN SANATORIUM OF THE JEFFERSON COUNTY ANTI-TUBERCULOSIS ASSOCIATION (1910—Reconstructed 1914):** For incipient and moderately advanced cases, originating in Jefferson County. *Capacity:*—40. *Rates:*—\$35 per month, or whatever patient can afford. No charge for indigents; 16 beds are supported by the county. *Superintendent:*—Miss K. I. Malone. *Medical Director:*—Dr. Julius Cooper. *Application* should be made to Rev. George Eaves, D. D., 2019 Avenue F. *How to reach:*—Take Milner Heights bus on 20th St.

**MOBILE**

**OVERLOOK SANATORIUM:** For tuberculosis and diseases of the lungs. *Capacity:*—12. *Rates:*—\$14 to \$35 per week. *Medical Director:*—Dr. E. A. Peterson. *Application* should be made to the medical director.
