## CHAPTER I.

### THE PHILOSOPHY OF KANT.

|                                                                                                                                               |    |
|-----------------------------------------------------------------------------------------------------------------------------------------------|----|
| Three phases of Schelling's speculations: (1) agnostic, (2) pantheistic, (3) theistic . . .                                                   | 1  |
| Schelling, the link connecting Hegel with Kant through Fichte . . . . .                                                                       | 3  |
| Relations of the <i>Transcendental Idealism</i> to Fichte's <i>Wissenschaftslehre</i> and Hegel's <i>Phenomenologie des Geistes</i> . . . . . | 3  |
| The Critical problem . . . . .                                                                                                                | 4  |
| Conditions of experience . . . . .                                                                                                            | 6  |
| Are there supersensible realities? If so, they are not objects of "experience," because they cannot be "schematized." . . . .                 | 8  |
| Reason compels us to seek for a totality of conditions . . . . .                                                                              | 12 |
| Rational Psychology, Cosmology and Theology uncritically identify Ideas of reason with supersensible realities . . . . .                      | 13 |
| Relation of Theoretical to Practical Reason; possibility of reconciling free and natural causation . . . . .                                  | 17 |

|                                                                                                |    |
|------------------------------------------------------------------------------------------------|----|
| Practical Reason proves the freedom and immortality of man, and the existence of God . . . . . | 22 |
| The world must be conceived by us as a teleological system . . . . .                           | 25 |

## CHAPTER II.

## THE EARLIER PHILOSOPHY OF FICHTE.

|                                                                                                            |    |
|------------------------------------------------------------------------------------------------------------|----|
| Free activity for Kant the essence of Reason . . . . .                                                     | 28 |
| Imperfect development of Kant's doctrine . . . . .                                                         | 30 |
| Fichte's simplification of it by the denial of any reality out of relation to human intelligence . . . . . | 33 |
| Contrast of Dogmatism and Idealism . . . . .                                                               | 35 |
| Dogmatism leads to Determinism and Materialism, and fails to explain conscious experience . . . . .        | 37 |
| Idealism starts from Intelligence as pure self-activity . . . . .                                          | 40 |
| Fundamental thesis, antithesis and synthesis . . . . .                                                     | 42 |
| Diremption of philosophy into Theoretical and Practical . . . . .                                          | 46 |
| Relation of Fichte's three fundamental propositions to the philosophy of Kant . . . . .                    | 47 |
| And to the Logic of Hegel . . . . .                                                                        | 50 |
| The Psychology of Fichte . . . . .                                                                         | 50 |
| Stages of knowledge: sensation, perception, imagination, understanding, judgment, reason . . . . .         | 53 |
| Practical Reason as the ultimate explanation of reality . . . . .                                          | 59 |
| Personality and Morality . . . . .                                                                         | 61 |
| Critical estimate of Fichte's earlier philosophy . . . . .                                                 | 64 |

## CHAPTER III.

## SCHELLING'S EARLIER TREATISES.

|                                                                                                                                                                                                                                                                                        |    |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----|
| Schelling's first work, <i>The Possibility of a Form of Philosophy in General</i> , deduces the categories of quality and modality from Fichte's fundamental propositions . . . .                                                                                                      | 70 |
| In <i>The I as Principle of Philosophy</i> , the absolute and the finite Ego are strongly opposed, subject and object coördinated, and the world viewed as manifesting unconscious reason . . . .                                                                                      | 71 |
| The <i>Philosophical Letters on Dogmatism and Criticism</i> regards the existence of an "objective" God as an unverifiable hypothesis, and conceives the absolute as the unrealisable goal of man's strivings . . . . .                                                                | 78 |
| <i>Essays in explanation of Idealism</i> : (1) Space and Time modes of the self-activity of intelligence; (2) The Kantians err by confusing the logical opposition of Subject and Object with their actual separation; (3) The essence of Spirit is infinite self-limitation . . . . . | 84 |
| Schelling's Philosophy of Nature connected with Kant's <i>Anfangsgründe der Naturwissenschaft</i> and <i>Kritik der Urtheilskraft</i> . . . . .                                                                                                                                        | 90 |
| In the <i>Ideas for a Philosophy of Nature</i> the various phenomena of the material world are deduced from the nature of Perception and Sensation . . . . .                                                                                                                           | 92 |
| The treatise <i>On the World Soul</i> reduces all                                                                                                                                                                                                                                      |    |

|                                                                                                                                             |    |
|---------------------------------------------------------------------------------------------------------------------------------------------|----|
| the phenomena of nature to a single force<br>manifesting itself in two opposite directions                                                  | 94 |
| In the <i>First Outline of the Philosophy of<br/>Nature</i> Schelling maintains nature to be<br>an eternal process of self-limitation . . . | 96 |

## CHAPTER IV.

## THE PROBLEM OF TRANSCENDENTAL IDEALISM.

|                                                                                                                                                                                                       |     |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| Schelling's gradual separation from Fichte . . .                                                                                                                                                      | 98  |
| Philosophy of Nature and Transcendental<br>Idealism two coördinate disciplines, the<br>former dealing with the totality of objects<br>and the latter with the totality of conscious<br>acts . . . . . | 100 |
| Criticism of philosophical dogmatism . . .                                                                                                                                                            | 101 |
| Intellectual Perception as the organ of phi-<br>losophy . . . . .                                                                                                                                     | 102 |
| Method of Transcendental Idealism . . . .                                                                                                                                                             | 104 |
| A single first principle necessary . . . .                                                                                                                                                            | 105 |
| That principle pure self-consciousness . . .                                                                                                                                                          | 106 |
| And is self-evident . . . . .                                                                                                                                                                         | 107 |
| Distinction and relation of consciousness and<br>self-consciousness . . . . .                                                                                                                         | 110 |
| Problem of Theoretical Philosophy: How do<br>subject and object seem to be independent of<br>each other? . . . . .                                                                                    | 112 |
| The three "epochs" or stages of knowledge . .                                                                                                                                                         | 114 |
