OFFICE OF THE GEOLOGICAL SURVEY,
JEFFERSON CITY, MISSOURI.
November 14th, 1891.

*To the President, Governor David R. Francis, and the members of the
Board of Managers of the Bureau of Geology and Mines:*

GENTLEMEN:—I have the honor to transmit to you, herewith, a preliminary report upon the coal deposits of the State. This report embodies part of the results of such observations in the coal fields as I have personally been able to make, during the past two years, in the time which could be spared from the administrative duties of my position and from the general direction of other work of the Survey. Though thus necessarily of a preliminary and incomplete nature, I feel that it will satisfy to a great extent a demand for immediate information which is made evident from frequent applications received at this office. In the light of these considerations I trust it may meet with your favor, and I, further, earnestly hope that it may prove of immediate benefit to the important interests of the State to which it relates.

Very respectfully submitted,

ARTHUR WINSLOW,
State Geologist.
