PREFACE.

Many books have been written on the subject of feet and footwear, but most of them being theoretical, are of little practical value to the general public; and after reading the scientific phrases, people are generally none the wiser. The writer having had many years of practical experience in the boot and shoe manufacturing business, and having made the foot and its proper treatment a special study, will give his readers the result of his experience, in the hope that people may profit by it and devote more care and attention to their downtrodden servitors than heretofore.
