## PREFATORY REMARKS.

---

[These early lessons are addressed to young scholars partly in the manner of oral teaching, with the inevitable omission however of many repetitions and illustrations which an intelligent teacher would naturally use.

Those parts of the lessons which are marked † may be passed over on first coming to them, but after the next lesson or two the former lessons should be reviewed and these parts brought in.

Passages enclosed in brackets are addressed to the Teacher.

These lessons have been specially prepared as an introduction to the larger work of the author, entitled 'The Scholar's Arithmetic,' which belongs to the same series.]

## CONTENTS.

---

LESSON	PAGE
1. FIRST NOTIONS OF COUNTING . . . . .	1
2. COUNTING MENTALLY . . . . .	3
3. COUNTING UP TO TEN . . . . .	5
