Figure 1. A 3D scatter plot showing the relationship between the number of species (S) and the number of individuals (N) for 10 different species. The plot shows a positive correlation between S and N, with a regression line fitted to the data points. The axes are labeled 'S' and 'N', and the data points are numbered 1 through 10.

ACCOUNT
OF
THE ISLAND OF FLORIDA¹

WE arrived at the port of Baya Honda, where we landed six hundred and twenty men and two hundred and twenty-three horses. As soon as we went on shore we found out, from some Indians taken, that there was a Christian in the country, one of the people who had come into it with Pánfilo de Narvaez, and we started in search of him. He was in the possession of a chief, some eight leagues distant from the harbour. We met him on the way, for the Cacique, hearing that we had left the ships, asked the Christian if it was his desire to go where we were; who answered that it was, and he sent him off with nine Indians. He came naked like them, with a
