PREFACE.

I DO not pretend to have done anything original —if this word is synonymous with new. It merely seems to me that the books treating of this important question of early childhood are for the most part inaccessible, and I have tried to condense into a few pages that which it is really indispensable to know on this subject. I hope that within proportions thus restricted, and with a total avoidance of everything for the comprehension of which scientific knowledge is required, these pages may be put into the hands of young girls and mothers, no matter what may be their education or position. I address myself chiefly to the masses, who are plunged in an absolute ignorance which it is time to enlighten.
