EDITORIAL NOTE

IN the preparation of this Index the aim has been to include, in addition to titles and authors' names, the *principal* subjects dealt with in each paper.

As regards taxonomic articles, all *new* species, and all species which are *described* are included. The same principle is applied to structural and physiological contributions; all species as to which original observations are recorded have been entered in the Index.

On the other hand species which are not new, and which are merely mentioned or enumerated without any description or observation being recorded, are omitted. They will be found under more general headings, e. g. 'Liliaceae occurring in Lord Howe Island.'

In every case where a species is entered in the Index, its *synonyms*, so far as they occur in the Annals, are also included.

The Index might easily have been made much fuller than it is, but it is hoped that enough has been included to serve the purpose of the working botanist, who desires to have easy access to all original or critical work which has appeared in the Annals of Botany during the first ten years of its existence.

1. The first part of the document discusses the importance of maintaining accurate records of all transactions and activities. It emphasizes that proper record-keeping is essential for transparency and accountability, particularly in the context of public administration and government operations. The text notes that without reliable records, it becomes difficult to track the flow of funds, assess performance, and identify areas for improvement.

2. The second part of the document outlines the various methods and tools used to collect and analyze data. It mentions the use of surveys, interviews, and focus groups to gather qualitative information, as well as the application of statistical software and data visualization techniques to process quantitative data. The author highlights the importance of ensuring the reliability and validity of the data collection process, as well as the need for clear communication of findings to stakeholders.

3. The third part of the document focuses on the challenges and limitations of data analysis. It discusses issues such as data quality, missing information, and the potential for bias in the selection and interpretation of data. The text also addresses the complexity of analyzing large datasets and the need for specialized expertise and resources. The author suggests that a combination of qualitative and quantitative methods can help to overcome these challenges and provide a more comprehensive understanding of the data.

4. The fourth part of the document discusses the implications of the findings for policy and practice. It notes that the results of the analysis can be used to inform decision-making and to identify areas for further research and development. The text emphasizes the importance of translating research findings into actionable insights and of involving stakeholders in the process of implementation. The author concludes by stating that the ultimate goal of the research is to improve the effectiveness and efficiency of public administration and to enhance the quality of services provided to citizens.

INDEX
TO
ANNALS OF BOTANY

VOLS. I—X (1887—1896).

[Synonyms are indicated by *italics*. An asterisk (*) indicates an illustration, and a dagger (†) a palaeobotanical article.]

- Absorption of water and its relation to the constitution of the cell-wall in Mosses (J. R. VAIZEY), i. 147.
Absorption of water by dead roots (W. WATSON), viii. 119; in *Polytrichum commune*, i. 148 *et seq.*; in *Polytrichum formosum*, i. 148.
Absorptive organ of *Trapelia* (*), ii. 90.
Abutilon albidum, pollination (*), v. 338.
Acacia lophocantha, respiration of wounded leaves, x. 575.
— pentaptera, cork-formation in thorns, vi. 160.
Acalypha indica, flowers (C. B. CLARKE) (*), i. 359.
Acanthaceae occurring in Lord Howe Island, x. 247.
Acantholimon glumaceum, stem-structure (*), v. 289.
— mucilage-glands (*), iv. 245.
Achillea Millefolium, insect-visitors, ix. 238.
Achlya, spore-formation, ii. 203 *et seq.*
Acrostichum borbonicum, *sp. n.*, description, v. 491.
— *fimbriatum*, description, v. 493.
— *Galvini*, description, v. 492.
— *Hartii*, *sp. n.*, description, v. 495.
— *Lastii*, *sp. n.*, description, v. 491.
— *lepidoglossum*, *sp. n.*, description, v. 492.
— *macrorrhizum*, *sp. n.*, description, v. 490.
— *maximum*, *sp. n.*, description, v. 490.
— *Miersii*, *sp. n.*, description, v. 490.
— *Poolii*, *sp. n.*, description, v. 493.
— *quitense*, *sp. n.*, description, v. 493.
— *Rawsoni*, *sp. n.*, description, v. 496.
— *savaiense*, *sp. n.*, description, v. 494.
— *Sherringii*, *sp. n.*, description, vi. 100.
— (*Elaophoglossum*) *Smithii*, *sp. n.*, v. 169.
Actinidia lanata, description, ix. 146.
ACTON, E. H.—Changes in the Reserve-Materials of Wheat on keeping, vii. 383.

- ACTON, E. H.—On the formation of sugars in the septal glands of *Narcissus* (with woodcuts 1-6), ii. 53.
- Adenandra obtusata, pollination, v. 340.
- Adiantum gomphophyllum, *sp. n.*, description, viii. 124.
- *hians*, description, v. 207.
- *Levingei*, *sp. n.*, description, v. 207.
- *neo-guineense*, description, v. 208.
- *pilosum*, *sp. n.*, description, v. 207.
- *ruizianum*, description, v. 206.
- *stenochlamys*, *sp. n.*, description, v. 209.
- *Williamsii*, description, v. 207.
- Aecidium, Presence of sexual organs in (G. MASSE) (*), ii. 47.
- Aegialitis, mucilage-glands (*), iv. 244.
- Aethophyllum, notes on (†), x. 211.
- Africa, South, Ornithophilous Flowers in (G. F. SCOTT-ELLIOT) (*), iv. 265.
- Agaricus, centrospheres in (*), viii. 322.
- *stercorarius*, nuclei of basidia, vi. 146.
- Agathosma elegans, pollination, v. 340.
- Agrostophyllum formosanum, description, ix. 157.
- Ahring, Johann Erik Ewald. Obituary notice, ii. 393.
- Ailanthus malabarica, corky thorns, a correction, x. 98.
- AITCHISON, J. E. T.—The source of Badsha or Royal Salep (with Plate X), iii. 149.
- Alaria esculenta, Grev., and Saccorhiza bulbosa, J. G. Ag., Note on (R. W. PHILLIPS), x. 96.
- intercalary growth, x. 97.
- Albica major, pollination (*), v. 392.
- Albuminate of flour and gluten, relation between the, ix. 206.
- Aleurites, On the extra-floral nectaries of (P. GROOM), viii. 228.
- Aleurone-grains in the Lupin, Development of (A. B. RENDLE) (*), ii. 161.
- of Gramineae, historical, ix. 211; structural, ix. 221.
- Aleurone-Layer of the seed of Grasses, The (P. GROOM), vii. 387.
- of wheat, ix. 214.
- Alexipharmics or Snake-bite Antidotes, Use of certain plants as (D. MORRIS), i. 153.
- Algae, British Marine, Revised list of (E. M. HOLMES and E. A. L. BATTERS), v. 63; appendix, v. 518.
- New Marine (E. M. HOLMES) (*), viii. 335.
- On some new British Marine (E. A. L. BATTERS) (*), ix. 307.
- Some new British (E. A. L. BATTERS), ix. 168.
- Algological notes (A. W. BENNETT) (*), vi. 150.
- Alkachlorophyll, preparation, &c., vi. 240.
- Allium Cepa, nuclear division (*), ix. 563 *et seq.*
- giganteum, bulb (*), iii. 152.
- leaf, i. 136.
- *Macleanii*, bulb (*), iii. 151.
- Alocasia *sp.*, laticiferous tissue in leaf, iii. 447.
- Alpinia mutica, development of seed (*), x. 25.
- Alsophila Elliottii, *sp. n.*, description, vi. 96.
- *formosana*, *sp. n.*, description, v. 190.
- *philippinensis*, description, v. 186.
- *Ridleyi*, *sp. n.*, description, viii. 122.
- *trichophlebia*, *sp. n.*, description, v. 189.

- Alternation of Generations, viii. 282, 343.
 — of Generations, Antithetic (J. BEARD), ix. 441.
 — of Generations in Green Plants (J. R. VAIZEY), iv. 371.
 — of Generations in Plants, On Antithetic as distinct from Homologous (F. O. BOWER), iv. 347.
 Amaranaceae occurring in Lord Howe Island, x. 249.
 Amaryllidaceae occurring in Lord Howe Island, x. 253.
 Amherstia nobilis, experiments on foliage, ix. 63 *et seq.*; hanging foliage (*), ix. 59.
 Amomum elongatum, development of the seed (*), x. 25.
 Amphicosmia Walkerae, leaf-apex, iii. 332; stem-apex (*), iii. 321.
 Amphithalea ericaefolia, pollination (*), v. 344.
 Anatomy of Plants, On some recent progress in our knowledge of the (D. H. SCOTT), iv. 147.
 Androcymbium leucanthum, pollination (*), v. 393.
 Anemone capensis, pollination, v. 334.
 Aneura multifida, nuclear division (*), ix. 489; spore-formation (*), viii. 49, ix. 489.
 Aneura pinguis, spore-formation, viii. 50.
 Angelica sylvestris, insect-visitors, ix. 244.
 Angiopteris evecta, antheridia and archegonia (*), vi. 266; development of wings of leaf (*), iii. 357; leaf-apex (*), iii. 337; stem-apex (*), iii. 323.
 — evecta, On the embryogeny of (J. B. FARMER) (*), vi. 265.
 Angraecum superbum, pollination (*), v. 378.
 Aniline, On the action of, on Green Leaves and other Parts of Plants (E. SCHUNCK and G. BREBNER) (*), vi. 167.
 Anisophyll, properties, &c., iii. 108, vi. 168.
Anisogonium Godmani, sp. n. (*), v. 166.
Anodendron oblongifolium, sp. n., description, v. 505.
 Anomalous cells in vascular and cellular Tissue of Fossil plants of coal measures (W. C. WILLIAMSON) (*), i. 315.
 — thickening in the roots of *Cycas Seemanni* (W. H. GREGG) (*), i. 63.
 Antheridia of *Lomentaria* (H. J. WEBBER) (*), v. 226.
 Anthocoma flavescens, Zoll., On the synonymy of (D. PRIN), vi. 214.
 Antholyza aethiopica, pollination, iv. 277.
 Anthurium crassinervium, laminal enations from the leaves, iii. 439.
 — traumatropic curvature of aerial root (*), viii. 430.
Antrophyum minimum, sp. n., description, v. 488.
 Antithetic alternation, viii. 343.
 — Alternation of Generations (J. BEARD), ix. 441.
 — and Homologous theories, vii. 367.
 — as distinct from homologous Alternation of Generations in Plants (F. O. BOWER), iv. 347.
 Apical cell of *Fucus* (W. WOODWORTH) (*), i. 203.
 Apical meristem in the roots of Pontederiaceae (S. SCHÖNLAND) (*), i. 179.
 — of root of *Eichhornia* (*), i. 180 *et seq.*
 Apocynaceae occurring in Lord Howe Island, x. 243.
Apocynum cannabinum, stem-structure (*), v. 283.
 Apogamy in *Lemanea* (*), iv. 211; in *Saprolegnia*, ix. 637; in *Trichomanes alatum* (*), i. 287 *et seq.*
 Aposporous developments in Ferns, Note on attempts to induce (F. O. BOWER), iv. 168.
 — growths on *Trichomanes alatum* (*), i. 279.
