PREFACE.

This little book is intended to help those who wish to write clearly on technical subjects. My experience in professional writing is not long enough to have entailed loss of sympathy with beginners, yet it is sufficient to have taught me the value of a guide in these matters. Rules are useful, but the understanding of the reason on which a rule is based is better. No man can apply a rule intelligently until he understands when to disregard it. Such hints as I have put together are those suggested by daily practice as an editor; they claim no finality; all of them may not prove acceptable; but if they provoke greater attention to the fundamentals of good technical writing, this essay will have accomplished a useful purpose.

T. A. RICKARD.

Table of Contents.

| | |
|--|-----|
| Preface. | |
| Introductory | 7 |
| Spurious Coin | 18 |
| Abbreviations | 20 |
| Numbers | 25 |
| The Matter of Education | 29 |
| Hyphens | 33 |
| Some Words and Their Ways | 40 |
| Unconsidered Trifles | 52 |
| Concerning Titles | 60 |
| Matters of Usage | 65 |
| Relative Pronouns | 74 |
| Examples of Journalese | 86 |
| Hints in Grammar | 94 |
| Minor Matters | 98 |
| Specifications | 103 |
| Things to Avoid | 107 |
| Good and Bad Writing | 108 |
| Parting Advice | 111 |
| A Plea for Greater Simplicity in the Language of Science | 113 |

INTRODUCTORY.

It has been said that in this age the man of science appears to be the only one who has anything to say, and he is the one that least knows how to say it. This applies with particular force to the technical expert, whose science is utilitarian and who, therefore, even more than the philosopher, is inclined to disregard the help of correct literary expression. In fact, the suggestion of attention to such minor matters is apt to be considered merely an irritating emphasis on a non-essential. The editor of a Denver mining paper felt assured of support when he expressed the opinion that attention to the niceties of literary form was a mere "frill"; all that was needed was "to get there," that is, to say what you mean in your own way. This view of the matter receives endorsement, in deed rather than in theory, from many writers on technical subjects. Moreover, the men of the mining and metallurgical professions are usually too busy to write leisurely, and in their hurry they are apt to be heedless of the qualities that enable language to fulfill its purpose.

Herein lies the root of the matter. Language is a vehicle of expression designed to convey ideas from one man to another. It was not intended for the soliloquy; civilized man does not live by himself, nor does he talk to himself. The spoken word is heard by those present; the written word reaches those at a distance; the printed word is intended to be read by thousands. Careful composition facilitates the conveyance of ideas, the primary purpose of writing being to transfer ideas from one man to
