THE following little book makes no pretence at being a systematic treatise on the subject on which it treats: its aim is to set forth Christian views on a point of popular belief which writers have generally considered worthy of ridicule or pity, or at least susceptible of a natural explanation.

With respect to stories hitherto unpublished, the writer has related none which he has not good grounds for believing; and he has endeavoured to state, in each particular account, the degree of evidence by which it is supported.

He ought, perhaps, to state, that he never saw Mr. Dendy's very interesting *Philosophy of Mystery* till he had almost concluded his own work. He has inserted, in different places, a few striking relations from it.
