A COLLECTION of examples in illustration of Analytical Geometry of Three Dimensions has long been required both by students and teachers, and the present work is published with the view of supplying the want. These examples have been principally obtained from University and College Examination Papers, but many of them are original. The results of the examples are given at the end of the book, together with hints for the solution of some of them.

ST JOHN'S COLLEGE,

July 17th, 1858.

In the second edition the work has been carefully revised, and the number of examples has been increased.
